

the criteria and NAAQS for ozone. This review includes preparation of two key documents, the Air Quality Criteria for Ozone and Related Photochemical Oxidants ("Criteria Document") and a related "Staff Paper." The purpose of the Staff Paper is to evaluate the policy implications of the key scientific and technical information contained in the Criteria Document and identify critical elements that EPA staff believe should be considered in reviewing the NAAQS. The Staff Paper is intended to "bridge the gap" between the scientific review contained in the Criteria Document and the public health and welfare policy judgments required of the Administrator in reviewing the NAAQS.

In January 2005, a first external review draft of the Criteria Document was released by EPA for public review and comment and for review by the CASAC of EPA's Science Advisory Board (70 FR 4850, January 31, 2005) at a public meeting held in May 2005. Comments received from review of the first draft document were considered in preparing the second draft Criteria Document released for public review and comment in August 2005 (70 FR 51810, August 31, 2005). Based on this document, the first Draft Staff Paper was released in November 2005 (70 FR 69761, November 17, 2005), and reviewed at a public meeting on December 8, 2005. Based on the information contained in the final Criteria Document, released in March 2006 (71 FR 10030, February 28, 2006), the second Draft Staff Paper includes assessments and analyses related to: (1) Air quality characterization; (2) integration and evaluation of health information; (3) exposure analysis; (4) health risk assessment; and (5) evaluation of information on vegetation damage and other welfare effects. The second Draft Staff Paper contains staff conclusions and options with respect to possible retention or revision of the current primary (health-based) and secondary (welfare-based) standards and identifies alternative standards for consideration by the Administrator.

The draft Exposure Analysis, Risk Assessment and Environmental Assessment technical support documents describe and present the results from an ozone exposure analysis and health risk assessment in several urban areas, and the impact of ozone on the environment. Draft plans upon which these assessments are based, the *Ozone Health Assessment Plan: Scope and Methods for Exposure Analysis and Risk Assessment* and the *Scope and Methods for Environmental Assessment Plan*, were previously reviewed by CASAC and the public. Comments

received on those plans have been considered in developing the draft Exposure Analysis, Risk Assessment and Environmental Assessment technical support documents being released at this time. The exposure analysis, risk assessment, and environmental assessment methodologies and results are also discussed in the second Draft Staff Paper.

The EPA is soliciting advice and recommendations from the CASAC by means of a peer review of the second Draft Staff Paper and drafts of the Exposure Analysis, Risk Assessment, and Environmental Assessment at an upcoming public meeting of the CASAC scheduled for August 24 and 25, 2006. A **Federal Register** notice will inform the public of the location of that meeting. Following the CASAC meeting, EPA will consider comments received from CASAC and the public in preparing a final Staff Paper and final Exposure Analysis, Risk Assessment, and Environmental Assessment technical support documents.
