

IV. Procedures for Withdrawal of Request

Registrants who choose to withdraw a request for cancellation must submit such withdrawal in writing to the person listed under **FOR FURTHER INFORMATION CONTACT**, postmarked before June 7, 2004. This written withdrawal of the request for cancellation will apply only to the applicable FIFRA section 6(f)(1) request listed in this notice. If the product(s) have been subject to a previous cancellation action, the effective date of cancellation and all other provisions of any earlier cancellation action are controlling. The withdrawal request must also include a commitment to pay any reregistration fees due, and to fulfill any applicable unsatisfied data requirements.

V. Provisions for Disposition of Existing Stocks

The effective date of cancellation will be the date of the cancellation order. The orders effecting these requested cancellations will generally permit a registrant to sell or distribute existing stocks for 1 year after the date the cancellation request was received. This policy is in accordance with the Agency's statement of policy as prescribed in the **Federal Register** of June 26, 1991 (56 FR 29362) (FRL-3846-4). Exceptions to this general rule will be made if a product poses a risk concern, or is in noncompliance with reregistration requirements, or is subject to a data call-in. In all cases, product-specific disposition dates will be given in the cancellation orders.

Existing stocks are those stocks of registered pesticide products which are currently in the United States and which have been packaged, labeled, and released for shipment prior to the effective date of the cancellation action. Unless the provisions of an earlier order apply, existing stocks already in the hands of dealers or users can be distributed, sold, or used legally until they are exhausted, provided that such further sale and use comply with the EPA-approved label and labeling of the affected product. Exception to these general rules will be made in specific cases when more stringent restrictions on sale, distribution, or use of the products or their ingredients have already been imposed, as in a Special Review action, or where the Agency has identified significant potential risk concerns associated with a particular chemical.

ENVIRONMENTAL PROTECTION AGENCY

[FRL-7657-1]

Notice of Proposed Administrative Order on Consent Pursuant to Section 122(g)(4) of the Comprehensive Environmental Response Compensation, and Liability Act (CERCLA), PCB Treatment, Inc. Superfund Site, Kansas City, KS, and Kansas City, MO, Docket No. 07-2004-0023

AGENCY: Environmental Protection Agency.

ACTION: Notice.

SUMMARY: Notice is hereby given that a proposed administrative order on consent between six potentially responsible parties (Respondents) at the PCB Treatment, Inc. Superfund Site (Site) and the United States Environmental Protection Agency (EPA) was signed by the EPA on January 21, 2004, and approved by the United States Department of Justice (DOJ) on April 14, 2004. The Respondents are: District of Columbia/Blue Plains Waste Water Treatment, East Point Electric, Flowserve Corporation, Newberry Water and Light, St. Rose Convent, and Tilton Terrace.

DATES: EPA will receive, for a period of thirty (30) days from the date of this publication, comments relating to the proposed agreement.

ADDRESSES: Comments should be addressed to Audrey Asher, Senior Assistant Regional Counsel, United States Environmental Protection Agency, Region VII, 901 N. Fifth Street, Kansas City, Kansas 66101 and should refer to the *PCB Treatment, Inc. Superfund Site Administrative Order on Consent, CERCLA Docket No. 07-2004-0023*.

The proposed agreement may be examined or obtained in person or by mail at the office of the United States Environmental Protection Agency, Region VII, 901 North Fifth Street, Kansas City, KS 66101 (913) 551-7255.

SUPPLEMENTARY INFORMATION: The Site consists of two facilities, about two miles apart, located in the industrial

areas of Kansas City, Kansas at 45 Ewing Street and Kansas City, Missouri at 2100 Wyandotte Street. The facilities were formerly operated by PCB Treatment, Inc., now a defunct corporation. Between 1982 and 1987, PCB Treatment, Inc. and its subsidiaries or affiliates treated and stored PCBs contained in used transformers, capacitors, oil, equipment, and other materials at the Wyandotte facility and the Ewing facility. During its period of operations, spills of PCB contaminated waste occurred.

Samples collected at the Site in the late 1990s indicated that the PCB contamination at Ewing Street exceeded 1,790 parts per million (ppm) in the building and 1,450 ppm in the soils. At Wyandotte Street, the PCB contamination exceeded 23,800 ppm in the building and 800 ppm in the soils.

Over 1000 parties arranged for disposal of PCB wastes at the Site. EPA identified a large number of these parties, including the Respondents, as *de minimis* parties. EPA offered settlements to the *de minimis* parties based on their allocated share of the waste plus a premium. EPA previously settled with 542 *de minimis* parties. Through this settlement, and subject to certain reopeners, EPA covenants not to sue Respondents for injunctive relief or response costs concerning the Site. In addition, Respondents receive contribution protection for matters addressed in the settlement.

Settlement funds received through this proposed administrative order on consent, totaling \$301,969.53, will be placed in the special account for the Site, with the other *de minimis* settlement funds, and used, primarily, to pay for cleanup of the Site.

Dated: April 21, 2004.

Mark Hague,

Acting Regional Administrator, United States Environmental Protection Agency, Region VII.
