

Systems 199 and 200. Moreover, specific USDA security requirements are adhered to through the USDA Cyber Security Manuals, including, but not limited to, DM3545-000 Personnel Security.

The RSMS contains personal information about USDA employees, including name, work telephone number, e-mail, work address, user ID, level of education, and gender. The information collected by the RSMS is necessary to determine the location of radiation material.

To address privacy issues and ensure protection of information provided by customers and employees, the RSD has completed a privacy impact assessment (PIA). It has been posted on the USDA Privacy Policy Web site. The PIA provides detailed information about steps taken by the agency to minimize the risk of unauthorized access to the system. These steps include role-based access controls; data encryption in transmission; physical and environmental protection; auditing; configuration management; and contingency planning. User identification and authentication are also provided in the form of unique user IDs and passwords that are issued to USDA personnel. The RSMS computing equipment is stored in a secure computer room, and physical access is restricted to approved USDA personnel.

The electronic data files for the RSMS are maintained in Washington, DC.

A backup of the RSMS is maintained in Beltsville, MD. Control measures implemented to prevent misuse of accessible data include unique user identification, a password protection protocol, and limitation of user roles through compartmentalization of allowed access. Agency-implemented cyber security measures and firewalls are built into the application user interface to monitor the use of the RSMS. The hard copy components of the system and computer files, tapes, and disks are kept in a safeguarded environment with access only by authorized personnel.

Information will be disclosed: To the Department of Justice or a court or adjudicative body in a proceeding when the agency determines that the information is relevant and necessary to litigation involving the United States or its employees; to the appropriate agency responsible for enforcing violations when a record on its face indicates a violation of law; to a Member of Congress at the written request of his or her constituent about whom the record is maintained; to the National Archives and Records Administration or the General Services Administration for

records management inspections; to agency contractors or others engaged by the agency to assist in performing agency services; to the appropriate agencies or entities if USDA suspects the confidentiality or security of the information was compromised; and to the NRC.

SUPPORTING DOCUMENTATION:

Systems Notice: The Department of Agriculture has attached advance copies of the **Federal Register** notice of the new system of records.
