

and operations plan (COP) for activities within the lease area. Revolution Wind, LLC has submitted a COP to BOEM proposing the construction, operation, maintenance, and conceptual decommissioning of the Revolution Wind project, a 704-megawatt (MW) commercial-scale offshore wind energy facility located within Lease Area OCS-A 0486 and consisting of up to 100 wind turbines, 2 offshore sub-stations, and 2 transmission cables to shore.

Revolution Wind anticipates activities potentially resulting in the taking of marine mammals could occur for the life of the requested regulations and LOA. This includes:

- Construction-related high-resolution site assessment geophysical surveys in all 5 years (248 survey days per year during Years 1; 25 survey days per year during Years 2 through 5);
- the installation of up to 100 WTG monopile foundations (12-meter (m) diameter piles) by impact pile driving from May through December in Year 1 over the course of 31 to 100 days;
- the installation of 2 OSS foundations by impact pile driving of 2 monopiles (15-m diameter piles) from May through December in Year 1 over the course of 2 days;
- the installation and removal of 2 temporary cofferdams by vibratory pile driving at the cable tie-in area in Year 1 (14 days for installation and 14 days for removal per cofferdam; 56 days total) or, as an alternative to cofferdams (and also at the cable tie-in area in Year 1), installation and removal of 2 casing pipes by pneumatic hammering and supporting sheet piles by vibratory pile driving (2 days for installation and 2 days for removal per casing pipe, 8 days total; 6 days for installation and 6 days for removal of support sheet piles per cable tie-in area, 24 days total); and,
- the potential detonation of up to 13 UXOs over the course of 13 days in Year 1 (1 UXO detonation per day, as necessary).

Revolution Wind has noted that these are the most accurate estimates for the durations of each planned activity, but that the schedule may shift over the course of the Project due to weather, mechanical, or other related delays.

#### Information Solicited

Interested persons may submit information, suggestions, and comments concerning Revolution Wind's request (see **ADDRESSES**). NMFS will consider all information, suggestions, and comments related to the request during the development of proposed regulations governing the incidental taking of marine mammals by Revolution Wind, if appropriate.
