**Notice of Lodging of Proposed Consent Decree Under the Clean Air Act**

On August 10, 2018, the Department of Justice lodged a proposed consent decree with the United States District Court for the Southern District of Illinois in the lawsuit entitled *United States and Illinois v. WRB Refining LP, et al.*, Civil Action No. 3:18–cv–01484.

In the complaint filed contemporaneously with the proposed consent decree, the United States and Illinois alleged that defendants WRB Refining LP and Phillips 66 Company (“WRB/P66”) violated various provisions of the Clean Air Act and the Illinois Environmental Protection Act at a refinery owned and operated by defendants (“Wood River Refinery”). The complaint sought injunctive relief and civil penalties. Under the proposed consent decree, WRB/P66 will implement a flare minimization and flare efficiency program to reduce emissions of volatile organic compounds; undertake a variety to practices to reduce pollution from valves and pumps; limit benzene emissions from wastewater management units; and develop and implement an operation and maintenance plan to improve the operation of the continuous emissions monitoring systems at the Wood River Refinery. As mitigation for past excess emissions, WRB/P66, among other things, will install a new vacuum truck unloading facility; set up monitoring devices around its wastewater treatment plant; and use low emissions valves when it has to replace
