k. *Description of Request:* The applicant proposes to temporarily modify the reservoir level elevation at the Sugar Hill reservoir for the remainder of 2020 due to dam safety concerns. The license is requesting to maintain the reservoir at the winter drawdown elevation of 1,747.5 feet mean sea level to reduce the safety risks associated with hydraulic head in the reservoir and resulting pressure on the concrete outlet structure. The licensee states that planned flow releases would meet or exceed the requirement to release 2.5 cubic feet per second, or inflow if less when the reservoir is at its summer minimum elevation. The applicant proposes this temporary modification until it can file and receive approval for an amendment to construct improvements to the conduit, which is expected to occur beginning in the spring of 2021.
