

Congressional concerns regarding possible localized reductions of these two species because of increased harvesting by commercial and recreational fishermen. The SAFMC believed that an FMP was necessary to protect and manage dolphin and wahoo resources and to address user group conflicts. The Magnuson-Stevens Act requires that, to the extent practicable, stocks shall be managed throughout their range. In the case of dolphin and wahoo, the ranges of these stocks extend beyond the SAFMC's area of jurisdiction. For this reason, NMFS initially designated the SAFMC as administrative lead in the development of a joint FMP in cooperation with the GMFMC, CFMC, NEFMC, and MAFMC. Nevertheless, the National Standard Guidelines (50 CFR 600.320) suggest that alternative management units may be justified if complementary management is planned for other geographic areas or if the unmanaged portion of the stocks are immaterial to proper management within the area under consideration for the alternate management unit, especially if designated alternate management units are specifically relevant to the FMP's objectives.

In the case of the dolphin and wahoo FMP, social and economic issues are identified as the SAFMC's primary objectives in the FMP. The proposed FMP is not attempting to rectify a biological problem with the stocks; neither stock is overfished nor approaching an overfished condition because of overfishing. The SAFMC has specific objectives to: (1) reduce localized reductions in fish abundance, which can have economic and social impacts; (2) minimize market disruptions from intense landings by all sectors; (3) minimize conflicts and competition between recreational and commercial user groups; and (4) optimize social and economic benefits by recognizing and maintaining the historical importance of the recreational fishery.

No similar economic and social issues requiring management have been identified for the Gulf of Mexico and Caribbean areas. In the Gulf of Mexico, about 90 percent of the combined dolphin and wahoo commercial and recreational landings are from the west coast of Florida. Of the two species, dolphin dominate the landings, and Florida has regulations in place that restrict the commercial harvest of dolphin to hook-and-line fishing in state waters (where most of the harvest occurs), thus limiting the potential for user group conflicts. Similarly, catches and landings for both dolphin and

wahoo in the Caribbean are minimal compared to the catches in the other areas, and in many instances, the catches are incidental to the catch of targeted species such as billfishes. Therefore, because of anticipated delays in finalizing a joint FMP, which could lead to exacerbated user conflicts in the South Atlantic's area of jurisdiction (U.S. Atlantic coast), NMFS finds merit in the SAFMC's request to forego further development of a joint FMP, and to develop an FMP for the U.S. Atlantic coast.

Inclusion of dolphin in the proposed FMP also would require removal of the U.S. Atlantic Ocean component of the dolphin stock from management in the Coastal Migratory Pelagics (CMP) FMP. The CMP FMP is implemented under authority of the Magnuson-Stevens Act by regulations at 50 CFR part 622. The CMP FMP is a joint plan involving both the GMFMC and SAFMC, and species in the fishery include king mackerel, Spanish mackerel, cero, cobia, dolphin, little tunny, and in the Gulf only, bluefish. Presently, the only regulations in the CMP FMP that pertain to dolphin are those that specify authorized fishing gears in the Atlantic and Gulf of Mexico exclusive economic zone. Removal of the U.S. Atlantic component of the dolphin stock from the CMP FMP would require a plan amendment and would have to be approved by a majority of the voting members, present and voting, of both the SAFMC and GMFMC. Wahoo in the Atlantic, the Gulf of Mexico, and Caribbean Sea, is not included in any Federal FMP.

NMFS requests public comments on the South Atlantic Council's proposal to be designated as the lead Council to prepare a new FMP to manage dolphin and wahoo for the U.S. Atlantic coast. Written comments will be reviewed and considered prior to NMFS' decision on this request.

Southwest Region, Pacific Islands Area Office; Public Meetings

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meetings.

SUMMARY: The Pacific Islands Area Office will hold public meetings on November 26 and November 27, 2002, from 3 p.m. to 6 p.m., to gather input to aid in the development of the American Samoa Observer Program.

ADDRESSES: The public meetings will be held at the Utelei Convention Center, Pago Pago, American Samoa.

FOR FURTHER INFORMATION CONTACT: Kevin Busscher, Port Coordinator; telephone: 973-2937, Ext. 215.

SUPPLEMENTARY INFORMATION:

Public Meetings

Public meetings will be conducted to gather input to aid in the development of the American Samoa Observer Program on Tuesday, November 26th and Wednesday November 27th from 3 p.m. to 6 p.m.

Topics to be discussed will include observer placement and specific duties, safety procedures, and vessel reimbursement.

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Kevin Busscher, 808-973-2937 Ext. 215 (voice) or 808-973-2941 (fax), at least 5 days prior to the meeting date.

Dated: November 15, 2002

[I.D. 110802C]

Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Coral, Coral Reefs, and Live/Hard Bottom Habitats and the Snapper-Grouper Fisheries of the South Atlantic; Exempted Fishing Permit

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of receipt of an application for an exempted fishing permit; request for comments.

SUMMARY: NMFS announces the receipt of an application for an exempted fishing permit (EFP) from Mr. Chris Ivers, Project Manager, on behalf of the North Carolina Aquariums (applicant), Raleigh, North Carolina. If granted, the EFP would authorize the applicant, with certain conditions, to collect up to 50 red porgy and up to 500 lb (227 kg) of coral/live rock each year for two years in Federal waters off North Carolina for public display. The three North Carolina Aquariums are located at Roanoke Island, Pine Knoll Shores, and Kure Beach, North Carolina. This EFP would replace the current EFP which expires on December 31, 2002.

DATES: Comments must be received no later than 5 p.m., eastern time, on December 23, 2002.

ADDRESSES: Comments on the application must be mailed to Peter Eldridge, Southeast Regional Office, NMFS, 9721 Executive Center Drive N., St. Petersburg, FL 33702. Comments also may be sent via fax to 727-570-5583. Comments will not be accepted if submitted via e-mail or Internet. The application and related documents are available for review upon written request to the address listed here.

FOR FURTHER INFORMATION CONTACT: Peter Eldridge, 727-570-5305; fax: 727-570-5583; e-mail: peter.eldridge@noaa.gov.

SUPPLEMENTARY INFORMATION: The EFP is requested under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 *et seq.*), and regulations at 50 CFR 600.745(b), concerning scientific research activity, exempted fishing permits, and exempted educational activity.

According to the applicant, the North Carolina Aquariums (NCA), located at Roanoke Island, Pine Knoll Shores, and

Kure Beach, are public, non-profit, self-supporting institutions established to promote an awareness, understanding and appreciation of the diverse natural and cultural resources associated with North Carolina's ocean, estuaries, rivers, streams and other aquatic environments. The aquariums are major educational and conservation institutions with free admission to school children in groups, and extensive field study and outreach programs. The specimens will be maintained in the NCA for public display.

The applicant intends, over a period of 2 years, to collect for public display up to 50 red porgy and up to 500 lb (227 kg) of coral/live rock annually.

The proposed collection for public display involves activities otherwise prohibited by regulations implementing the Fishery Management Plans for Coral, Coral Reefs, and Live/Hard Bottom Habitats and the Snapper-Grouper Fisheries of the South Atlantic Region (FMPs). The applicant requires authorization to harvest and possess corals, live rock, and red porgy off North Carolina.

Based on a preliminary review, NMFS finds that this application warrants further consideration and intends to issue an EFP. A final decision on issuance of the EFP will depend on a NMFS review of public comments received on the application, conclusions of environmental analyses conducted pursuant to the National Environmental Policy Act, and consultations with North Carolina, the South Atlantic Fishery Management Council, and the U.S. Coast Guard. The applicant requests a 24-month effective period for the EFP.

Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Coral, Golden Crab, Shrimp, Spiny Lobster, Red Drum, Coastal Migratory Pelagic Resources, and Snapper-Grouper Fisheries of the South Atlantic; Exempted Fishing Permit

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of receipt of an application for an exempted fishing permit; request for comments.

SUMMARY: NMFS announces the receipt of an application for an exempted fishing permit (EFP) from Mr. Steve Vogel III, Curator, South Carolina Aquarium on behalf of the South Carolina Aquarium (applicant), Charleston, South Carolina. If granted, the EFP would authorize the applicant, with certain conditions, to collect an average of 25 specimens each of numerous species of marine invertebrates and marine fish from Federal waters off South Carolina for public display. This EFP would replace a former EFP which expires on December 31, 2002.

DATES: Comments must be received no later than 5 p.m., eastern standard time, on December 23, 2002.

ADDRESSES: Comments on the application must be mailed to Peter Eldridge, Southeast Regional Office, NMFS, 9721 Executive Center Drive N., St. Petersburg, FL 33702. Comments also may be sent via fax to 727-570-5583. Comments will not be accepted if submitted via e-mail or Internet.
