Form No.: Not applicable.

Type of Review: New collection.

Number of Respondents: 94 respondents; 94 responses.

Estimated Time per Response: An average of 21 hours per response.

Total Annual Burden: 1,974 hours.

Total Annual Cost: None.

Nature and Extent of Confidentiality: An assurance of confidentiality is not offered because this information collection does not require the collection of personally identifiable information (PII) from individuals.

Privacy Act Impact Assessment: Not applicable.

Needs and Uses: The Commission is seeking emergency processing of this information collection by September 13, 2007.

Pursuant to the Commission's *700 MHz Second Report and Order* (FCC 07-132, released August 10, 2007), this information collection requires every 700 MHz Band public safety licensee, whether holding individual narrowband authorizations or operating pursuant to a State License, to provide the following information to the Commission: (1) The total number of narrowband mobile and portable handsets in operation in channels 63 and 68, and the upper one megahertz of channels 64 and 69, as of 30 days after the date of adoption of its *700 MHz Second Report and Order*, (2) the total number of narrowband base stations serving these handsets in operation, (3) contact information for each identified set of handsets and base stations, as appropriate, (4) the areas of operation of the mobile and portable units (such as defined by the jurisdictional boundaries of the relevant public safety departments), and (5) the location, in latitude and longitude, of the base stations.

In order to create a nationwide, interoperable public safety broadband network, the *700 MHz Second Report and Order* establishes a public safety band plan consistent with such a network. It consolidates narrowband operations in the upper twelve megahertz of the 700 MHz Public Safety band and designates the lower ten megahertz of that band solely for broadband communications. It also shifts the public safety spectrum block down by one megahertz in order to avoid interference problems along the border with Canada. This requires relocation of all public safety narrowband operations in channels 63 and 68, and the upper one megahertz of channels 64 and 69. The *700 MHz Second Report and Order* requires the winner of Upper 700 MHz Band D Block license to pay the costs associated with relocating public safety narrowband operations to the consolidated channels. It also assigns responsibility to a newly created Public Safety Broadband Licensee to administer the relocation process consistent with the requirements and deadlines set forth in *700 MHz Second Report and Order*. This information collection will identify the actual numbers of radios and base stations that the winner of the D Block license will be responsible for paying the costs of relocating.
