Specifically, the licensee requests that the instantaneous 5 cubic feet per second (cfs) minimum flow requirement be reduced to 3 cfs from May 11 to October 15, 2015. During this time the licensee would also maintain a target flow of 5 cfs, based on a 24-hour average flow at gage YB-292. The licensee states that the variance is necessary due to reduced water deliveries in the upstream canal system during the ongoing drought and the large fluctuations caused by irregular water withdrawals in the canal system made by other users.

j. *Description of Project Facilities*: (1) A 6-foot-high diversion structure; (2) a 2,300-foot-long penstock; (3) a powerhouse containing two generating units with a combined installed capacity of 300 kW; (4) a 10,000-foot-long underground transmission line; (5) a 2.5-mile-long, 12.5-kV overhead transmission line; and (6) appurtenant facilities.

k. *Description of Proceeding*: The licensee is in violation of Article 24 of its license, which was issued October 7, 1985 (33 FERC ¶ 62,017). Article 24 states in part: If the Licensee shall abandon or discontinue good faith operation of the project or refuse or neglect to comply with the terms of the license and the lawful orders of the Commission, the Commission will deem it to be the intent of the Licensee to surrender the license.

Commission records indicate that the project has not operated since the project penstock ruptured in 1994. After several years of correspondence regarding restoring project operation, the licensee has become non-responsive. The licensee most recently filed a plan and schedule to restore project operation with the Commission on February 6, 2014. By letter dated March 6, 2014, the Commission acknowledged the filing and required the licensee to file progress reports January 1 and June 1 of each year to ensure the licensee's continued progress towards restoring project operation. The licensee did not file the first progress report due on June 1, 2014. By letter dated November 12, 2014, the Commission indicated the licensee must file the overdue progress report, failure to do so would result in an implied surrender of the project license. To date, the licensee has not filed a response and the project remains inoperable.
