SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for revision and extension of a current information collection.

The Large Pelagic Fishing Survey consists of dockside and telephone surveys of recreational anglers for large pelagic fish (tunas, sharks, and billfish) in the Atlantic Ocean. The survey provides the National Marine Fisheries Service (NMFS) with information to monitor catch of bluefin tuna, marlin and other federally managed species. Catch monitoring in these fisheries and collection of catch and effort statistics for all pelagic fish is required under the Atlantic Tunas Convention Act and the Magnuson-Stevens Fishery Conservation and Management Act. The information collected is essential for the United States (U.S.) to meet its reporting obligations to the International Commission for the Conservation of Atlantic Tuna.

This action seeks to revise the Large Pelagic Fishing Survey OMB Control No. 0648-0380 in the following ways:

- Drop the Large Pelagics Headboat Survey (LPHS) component.
- Increase the annual Large Pelagics Telephone Survey (LPTS) target sample size from 10,780 to 15,900 interviews for Northeast and Southeast combined.
- Add up to five questions to the LPTS questionnaire.
- Add a non-response follow-up survey to the LPTS in the Southeast region (previously only the Northeast was covered).
- Reduce the Large Pelagics Biological Survey annual sample size from 1,500 to 1,000 interviews.
