II. What Action is the Agency Taking?

These documents were developed using the OP public participation process. The process was designed to increase transparency and maximize stakeholder involvement, and provides numerous opportunities for public comment. EPA has also conducted extensive outreach to affected parties. EPA is taking this action without a formal comment period. The public participation process for trichlorfon provided opportunities for public comment as EPA developed these decisions. To read more about the OP public participation process, see <http://www.epa.gov/pesticides/op/process.htm>. Below is a brief summary of EPA's interim decisions, which are fully described in the TRED or interim reregistration eligibility decision (IRED) documents.

A. Trichlorfon Decision

EPA has reassessed risks from non-occupational exposure to trichlorfon through food, drinking water, and residential uses. Trichlorfon is not expected to pose risk concerns for these exposures provided that risk mitigation measures identified in the TRED for trichlorfon are adopted. Under the FQPA, EPA must review tolerances and tolerance exemptions that were already

in effect when Congress enacted the FQPA in August 1996, to ensure that existing pesticide residue limits for food and feed commodities meet the safety standard of the new law. EPA completed a RED for trichlorfon in September 1995, prior to FQPA enactment, and therefore needed an updated assessment to consider the provisions of the Act. In reviewing these tolerances, the Agency must consider, among other things, aggregate risks from non-occupational sources of pesticide exposure, whether there is increased susceptibility to infants and children, and the cumulative effects of pesticides with a common mechanism of toxicity. Once the Agency has considered the cumulative risks for the OPs, tolerances for trichlorfon will be reassessed in that light.

The Agency also reevaluated the occupational risks for trichlorfon, based on newly submitted data associated with the current non-agricultural uses. Risk mitigation measures to be implemented for these uses included:

1. Limiting application of trichlorfon to tees and greens of golf course turf.
2. Cancelling foliar application of trichlorfon to ornamental plants (only direct application to soil is allowed).
3. Allowing only truck-drawn spraying of large ponds for ornamentals and bait fish, and requiring an on-off switch inside the truck cab.

B. Next steps

EPA's next step under FQPA is to consider a cumulative risk assessment and risk management decision for the OP pesticides, which share a common mechanism of toxicity. Because the Agency has not yet considered the cumulative risks for the OPs, the Agency's interim decisions do not fully satisfy the reassessment of the existing food residue tolerances as required by FQPA. When the Agency has considered the cumulative risks for the OPs, then the tolerances for OP pesticides will be reassessed in this light. At that time, the Agency will complete the FQPA requirements for the OPs and, where required, make final REDs, which may include further risk mitigation measures.
