1. Help America Vote Act—0960-NEW.

Background

On October 29, 2002, President George W. Bush signed into law H.R. 3295, the Help America Vote Act (HAVA) of 2002, which mandates the verification of newly registered voters. HAVA places certain requirements upon SSA in terms of verifying information to be used for each State's voter registration process. SSA's role in HAVA is defined in Section 303 of the law. Section 303 requires each State to implement a computerized statewide voter registration list and to verify voter information with the State motor vehicle administration (MVA) records, or if none exist, with SSA records.

HAVA Information Collection

Individuals registering to vote must provide their driver's license number to the State election agency. If they have no driver's license or State-issued identity card they must supply the last four digits of the Social Security number (SSN). The State election agency will forward the new registrant name, date of birth, and the last four digits of the SSN to the State MVA.

SSA requires State MVAs to use the American Association of Motor Vehicle Administrations (AAMVA) as a consolidation point for data transfer.

The data, as input by the MVA, routes the applicant's information to the AAMVA network hub. AAMVA forwards the transaction to SSA's HAVA verification system. The result will be returned from SSA to the AAMVA hub for distribution to the State MVA.

The respondents to the HAVA collection are the various State MVAs responsible for verifying voter registration information.

Type of Request: New Information Collection.

Number of Respondents: 50 State MVAs.

Total Annual Responses: *1,000,000.

Average Burden per Response: 2 minutes.

Estimated Annual Burden: 33,333 hours.

[*The actual number of responses per State will vary based on population. Therefore, the total number of responses is based on data of new voter applications received by all 50 States in 1999-2000.]

2. Public Understanding Measurement System (PUMS)—0960-0612.

As required by Section 2(b) of the Government Performance and Results Act, which provides that Agencies establish the means for measuring their progress in achieving agency-level goals, SSA established the PUMS in 1998 as a tool for measuring its performance in meeting its strategic objectives in the area of public knowledge about and understanding of the Social Security program. The instrument used in PUMS is a national phone survey of adult Americans (age 18 and over) conducted annually for SSA by a professional polling organization. The PUMS survey instrument is designed to collect knowledge data from key populations toward which SSA has targeted education and outreach programs. Additionally, the survey is intended to assure a valid knowledge measure for key populations at the national level. This information is a crucial step in making SSA more focused and effective

in its communication programs. The respondents are randomly selected adults residing in the United States.

Type of Request: Extension of an OMB-approved information collection.

Number of Respondents: 1,400.

Frequency of Response: 1.

Average Burden per Response: 15 minutes.

Estimated Annual Burden: 350 hours.

3. Railroad Employment

Questionnaire—20 CFR 404.1401, 404.1406–1408—0960–0078.

SSA uses form SSA–671 to secure sufficient information to effect the required coordination with the Railroad Retirement Board (RRB) for Social Security claims processing. It is completed whenever claimants give indications of having been employed in the railroad industry. The respondents are applicants for Social Security benefits, who have had railroad employment, or dependents of railroad workers.

Type of Request: Extension of an OMB-approved information collection.

Number of Respondents: 125,000.

Frequency of Response: 1.

Average Burden Per Response: 5 minutes.

Estimated Annual Burden: 10,417 hours.

4. Statement of Income and

Resources—20 CFR 416.207, 416.301–310, 416.704 and 416.708—0960–0124.

The information collected on form SSA–8010–BK is used in SSI claims and redeterminations to obtain information about the income and resources of: ineligible spouses, parents/spouses of parents, and children living in the claimant's/beneficiary's household; essential persons; and sponsors of aliens (including spouses of sponsors who live with the sponsor). The information is needed to make initial or continuing eligibility determinations for SSI claimants/beneficiaries who are subject to deeming. If eligible, the information is used to determine the amount of the SSI payment. The respondents are persons whose income and resources must be considered in determining the eligibility of SSI claimants or beneficiaries.

Type of Request: Revision of an OMB-approved information collection.

Number of Respondents: 341,000.

Frequency of Response: 1.

Average Burden Per Response: 26 minutes.

Estimated Annual Burden: 147,767 hours.

5. Government Pension

Questionnaire—20 CFR 404.408a—0960–0160.

The Social Security Act and the Code of Federal Regulations provide that an

individual receiving spouse's benefits and concurrently receiving a Government pension, based on the individual's own earnings, may have the Social Security benefit amount reduced by two-thirds of the pension amount.

The data collected on form SSA–3885 is used by SSA to determine if the individual's Social Security benefit will be reduced, the amount of the reduction, and if one of the exceptions in 20 CFR 404.408a applies. The respondents are individuals who are receiving, or will receive, Social Security spouse's benefits and also receive their own Government pension.

Type of Request: Extension of an OMB-approved information collection.

Number of Respondents: 76,000.

Frequency of Response: 1.

Average Burden Per Response: 12.5 minutes.

Estimated Annual Burden: 15,833 hours.

6. Teacher Questionnaire (SSA–5665–BK); Request for Administrative Information (SSA–5666–BK)—20 CFR 416.924a and 20 CFR 404.1520—0960–0646.

If an individual who is claiming disability under Title XVI or Title II is currently, or has recently been, in an education program, SSA must obtain information about his or her functioning from teachers, instructors, and other education personnel who have the opportunity to observe the individual on a day-to-day basis. Educational programs are an important source of evidence and often provide formal assessment results and other kinds of information from a variety of disciplines. Evidence obtained from educational programs varies a great deal, however, in format, content, reliability, and usefulness. The need exists, therefore, for an information collection instrument that will assure a degree of uniformity and consistency in the quantity and quality of information received about a claimant's (or beneficiary's/recipient's) impairment-related limitations.

SSA–5665–BK

Type of Request: Revision of OMB-approved information collection.

Number of Respondents: 557,000.

Frequency of Response: 1.

Average Burden Per Response: 20 minutes.

Estimated Annual Burden: 185,667 hours.

SSA–5666

Type of Request: Revision of OMB-approved information collection.

Number of Respondents: 555,000.

Frequency of Response: 1.

Average Burden Per Response: 15 minutes.

Estimated Annual Burden: 138,750 hours.

Dated: April 19, 2005.
