Cascade Creek, LLC; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

On February 1, 2011, Cascade Creek, LLC filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of the Cascade Creek Hydroelectric Project (Cascade Creek project) to be located on Cascade Creek, Swan Lake, and Falls Lake in the vicinity of Petersburg, Alaska. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed project will consist of the following: (1) A low-head weir on Swan Lake with a 3-foot-high, 50-foot-long crest gate and an intake siphon; (2) a 16,000-foot-long, 12 to 14-foot diameter unlined power conduit; (3) an 780-foot-long, 9-foot-diameter steel penstock from the power conduit to the powerhouse; (4) a 140-foot by 80-foot concrete and metal powerhouse containing three turbines with a capacity of 70 megawatts (MW); (5) an approximately 18.7-mile-long, 138-kV transmission line which will tie into an undetermined interconnection near Petersburg; and (6) appurtenant facilities. The estimated annual generation of the Cascade Creek project would be 205 gigawatt-hours.
