

significantly increase traffic levels. Therefore, activities associated with transportation of classified material would not result in significant environmental impacts. The NRC staff evaluated the potential for environmental impacts at the GLE headquarters facility from the proposed approval of the SPPP, which involves modifications to systems used for security, and concluded that the proposed action would not involve any significant construction impacts.

The NRC staff assessed the impacts of the proposed action on land use; historical and cultural resources; visual and scenic resources; climatology, meteorology and air quality; geology, minerals, and soils; water resources; ecological resources; socioeconomic; noise; traffic and transportation; public and occupational health and safety; and waste management and concluded that the proposed action would have no significant environmental impacts on these resource areas. The NRC staff determined that there are no cumulative impacts associated with the proposed action.

Environmental Impacts of the Alternatives to the Proposed Action

As an alternative to the proposed action, the staff considered denial of the proposed action (i.e., the “no-action” alternative). Under this alternative, GLE

would not be granted approval of the SPPP and TSP for the new location. Denial of the proposed action would result in GLE being unable to conduct operations related to classified matter at its headquarters location. The NRC staff concluded that environmental impacts from the no-action alternative would not be significant.

Agencies and Persons Consulted

The Endangered Species Act (ESA) was enacted to prevent further decline of endangered and threatened species and restore those species and their critical habitat. Section 7 of the ESA requires Federal agencies to consult with the U.S. Fish and Wildlife Service or the National Marine Fisheries Service, as appropriate, regarding actions that may affect listed species or designated critical habitats. The NRC staff has determined that the proposed action would have no effect on threatened or endangered species or critical habitat. Therefore, consultation under section 7 of the ESA is not required.

Section 106 of the National Historic Preservation Act (NHPA) requires Federal agencies to consider the effects of their undertakings on historic properties. As stated in the NHPA, historic properties are any prehistoric or historic district, site, building, structure, or object included in or eligible for

inclusion in the National Register of Historic Places. The NRC staff has determined that the undertaking is a type of activity that does not have the potential to cause effects on any historic properties that may be present. Therefore, in accordance with 36 CFR 800.3(a)(1), the NRC has no further obligations under section 106 of the NHPA.

III. Finding of No Significant Impact

GLE has requested approval of its SPPP and TSP for the new headquarters facility. The NRC staff has prepared an EA as part of its review of the proposed action. The proposed action would have no significant radiological or non-radiological impacts to environmental resources. This FONSI incorporates by reference the EA in Section II of this notice. On the basis of this EA, the NRC staff concludes that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the NRC has determined not to prepare an environmental impact statement.
