ICR Title: Foreign Purchaser Acknowledgment Statement of Unregistered Pesticides (OMB NO. 2070-0027; EPA No. 0161.09)

ICR Status: This is a request for extension of an existing approved collection that is currently scheduled to expire on November 30, 2002. EPA is asking OMB to approve this ICR for three years. Under 5 CFR 1320.12(b)(2), the Agency may continue to conduct or sponsor the collection of information while the submission is pending at OMB.

Abstract: This information collection program is designed to enable the Environmental Protection Agency (EPA) to provide notice to foreign purchasers of unregistered pesticides exported from the United States that the pesticide product cannot be sold in the United States. Section 17(a)(2) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) requires an exporter of any pesticide not registered under FIFRA section 3 or sold under FIFRA section 6(a)(1) to obtain a signed statement from the foreign purchaser acknowledging that the purchaser is aware that the pesticide is not registered for use in, and cannot be sold in, the United States. A copy of this statement must be transmitted to an appropriate official of the government in the importing country. The purpose of the purchaser acknowledgment statement requirement is to notify the government of the importing country that a pesticide judged hazardous to human health or the environment, or for which no such hazard assessment has been made, will be imported into that country. This information is submitted in the form of annual or per-shipment statements to the EPA, which maintains original records and transmits copies thereof to appropriate government officials of the countries which are importing the pesticide.

Burden Statement: The annual "respondent" burden for this ICR is estimated to be 24,753 hours. According to the Paperwork Reduction Act (PRA), "burden" means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology

and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information. The Agency may not conduct or sponsor, and a person is not required to respond to a collection of information that is subject to approval under the PRA, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's information collections appear on the collection instruments or instructions, in the **Federal Register** notices for related rulemakings and ICR notices, and, if the collection is contained in a regulation, in a table of OMB approval numbers in 40 CFR part 9.

The following is a summary of the burden estimates taken from the ICR:

Respondents/affected entities: Individuals or entities engaged in activities related to the registration of a pesticide product.

Estimated total number of potential respondents: 2,500.

Frequency of response: Annual or per-shipment.

Estimated total/average number of responses for each respondent: 1.

Estimated total annual burden hours: 24,753.

Estimated total annual burden costs: \$1,902,400.

According to the procedures prescribed in 5 CFR 1320.12, EPA has submitted this ICR to OMB for review and approval. Any comments related to the renewal of this ICR should be submitted within 30 days of this notice, as described above.

Dated: November 22, 2002.

Director, Collection Strategies Division.

SUPPLEMENTARY INFORMATION:

Title: NSPS for Beverage Can Surface Coating—40 CFR part 60, subpart WW, OMB Control Number 2060-0001, EPA ICR Number 0663.08, expiration date January 31, 2003. This is a request for extension of a currently approved collection.

Abstract: The New Source Performance Standards (NSPS) for Surface Coating of Beverage Cans were proposed on November 26, 1980, and promulgated on August 25, 1983. These standards apply to each beverage can surface coating operation in which organic coatings are applied (exterior base coat operations, over varnish coating operations, and inside spray coating operations) that commenced construction, modification or reconstruction after November 26, 1980. Approximately 46 sources are currently subject to the standard, and it is estimated that 2 sources per year will

become subject to the standard during this time period. Volatile Organic Compounds (VOCs) are the pollutants regulated under this subpart, and this information is being collected to assure compliance with 40 CFR part 60, subpart WW.

Owners or operators of the affected facilities described must make initial reports when a source becomes subject, conduct and report on a performance test, demonstrate and report on continuous monitor performance, and maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility. Semiannual reports of excess emissions are required. These notifications, reports, and records are essential in determining compliance; and are required, in general, of all sources subject to NSPS.

Any owner or operator subject to the provisions of this part shall maintain a file of these measurements, and retain the file for at least 2 years following the date of such measurements, maintenance reports, and records. The estimated total cost of this ICR will be \$1,085,853 over the next three years (including labor hours, operating & maintenance costs, and start up costs; \$361,951 \times 3 years). All reports are sent to the delegated State or Local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA Regional Office.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15. The **Federal Register** document required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on June 20, 2002. Comments were not received.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 38 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to respond to a collection of information;

search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities:

Owners/Operators of beverage can surface coating facilities.

Estimated Number of Respondents: 48.

Frequency of Response: semiannual for all, every other year for excess emission report.

Estimated Total Annual Hour Burden: 4642.

Estimated Total Annualized Capital, O&M Cost Burden: \$96,800.

Send comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques to the addresses listed above. Please refer to EPA ICR Number 0663.08 and OMB Control Number 2060-0001 in any correspondence.

Dated: November 18, 2002.
