

dredged material site is located far from known pollution sources, therefore providing reasonable assurance that the material has not been contaminated. The COE permit will address concerns regarding ocean disposal.

The F.O.G. Corporation recommended use of its liquid bio-polymer to meet EPA discharge requirements and avoid construction of the outfall. The recommended bio-polymer product does not include removal of dissolved nutrients and therefore is not a viable alternative to the proposed action.

Conclusion

In determining how to dispose of wastewater effluent from the WWTP at Fort Kamehameha, I considered the following: present ability of the WWTP to comply with more stringent anticipated discharge wastewater effluent limits; technical feasibility; operational reliability; environmental impacts; costs associated with construction, operation, and maintenance of facilities; and comments received during the DEIS and FEIS public involvement periods.

After carefully weighing all of these factors and analyzing the data presented in the FEIS, I have determined that the preferred alternative, constructing a deep ocean outfall to replace the existing outfall, best meets the requirements for the disposal of wastewater effluent from the WWTP at Fort Kamehameha. Therefore, on behalf of the DON, I have decided to implement the proposed action by constructing a deep ocean replacement outfall and to retain the existing outfall for emergency bypass purposes. In addition to the specific mitigation measures identified in this ROD, the DON will continue to review its operational procedures and coordinate with other federal, state, and local entities as necessary to determine if any additional mitigation measure are feasible and practicable.

Office of Student Financial Assistance Programs

Type of Review: New Collection.

Title: The Leveraging Educational Assistance Program (LEAP) and Special Leveraging Educational Assistance Program (SLEAP) Programs.

Abstract: The LEAP and SLEAP programs use matching Federal and State Funds to provide a nationwide system of grants to assist postsecondary educational students with substantial financial need. On this performance report the states provide information the

Department requires about the state's use of program funds in order to demonstrate compliance with the program's statutory and regulatory requirements. Federal program officials use the performance report data for monitoring program funds distribution. With the clearance of this collection, the Department is seeking to automate the performance reporting process for both the LEAP Program and the subprogram, SLEAP. There are no significant changes to the current LEAP form data elements, there are however, additional items pertaining to the SLEAP program.

Additional Information: Because of the changes to the law and new program requirements, the short time schedule for development of forms, and obtaining state involvement in the process, we are requesting emergency approval of this new performance report form by July 10, 2001. This would allow for the needed time by states to plan and begin reporting under the programs as soon as possible.
