

the average annual burden per registrant respondent from 1 hour to 7.5 hours per respondent to be consistent with the average burden per refiller or swimming pool supply company. Third, for entities subject to the containment requirements, some activities in the previous ICR were completed by the compliance date of August 16, 2009. This ICR is focusing only on the ongoing annual information collection activities for the containment requirements, resulting in a corresponding decrease in the estimated annual burden per respondent from the previous ICR. This change is an adjustment.

C. Docket ID Number EPA-HQ-OPP-2012-0744

Title: Tolerance Petitions for Pesticides on Food/Feed Crops and New Inert Ingredients.

ICR number: EPA ICR No. 0597.11.

OMB control number: OMB Control No. 2070-0024.

ICR status: The approval for this ICR is scheduled to expire on July 31, 2013.

Abstract: The use of pesticides to increase crop production often results in pesticide residues in or on the crop. To protect the public health from unsafe pesticide residues, EPA sets limits on the nature and level of residues permitted pursuant to section 408 of the Federal Food, Drug, and Cosmetic Act (FFDCA). A pesticide may not be used on food or feed crops unless the Agency has established a tolerance (maximum residue limit) for the pesticide residues on that crop or established an exemption from the requirement to have a tolerance.

Under the law, EPA is responsible for ensuring that the maximum residue levels likely to be found in or on food/feed are safe for human consumption through a careful review and evaluation of residue chemistry and toxicology data. In addition, EPA must ensure that adequate enforcement of the tolerance can be achieved through the testing of submitted analytical methods. If the data are adequate for EPA to determine that there is a reasonable certainty that no harm will result from aggregate exposure, the Agency will establish the tolerance or grant an exemption from the requirement of a tolerance.

This ICR only applies to the information collection activities associated with the submission of a petition for a tolerance action. While EPA is authorized to set pesticide tolerances, the Food and Drug Administration (FDA) is responsible for their enforcement. Food or feed commodities found to contain pesticide residues in excess of established tolerances are considered adulterated,

and are subject to seizure by FDA, and may result in civil penalties.

Trade secret or CBI is frequently submitted to EPA in support of a tolerance petition because submissions usually include the manufacturing process, product formulation, and supporting data. When such information is provided to the Agency, the information is protected from disclosure under FIFRA section 10. CBI data submitted to the EPA is handled strictly in accordance with the provisions of the FIFRA Confidential Business Information Security Manual.

Burden statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average from 1,726 hours for each petitioner response and 1,739 hours for each IR-4 response. The ICR, a copy of which is available in the docket, provides a detailed explanation of this estimate, which is only briefly summarized here:

Respondents/Affected entities: Entities potentially affected by this ICR include anyone who files a petition asking EPA to take a specific tolerance action. While any entity can file a petition with EPA, petitions typically come from those businesses engaged in the manufacturing of pesticides and the Interregional Research Project No. 4 (IR-4). The NAICS codes for the most frequent type of respondent are 325320 (pesticide and other agricultural chemical manufacturing) and 541600 (management, scientific, and technical consulting services).

Estimated total number of potential respondents: 137.

Frequency of response: On occasion.

Estimated total average number of responses for each respondent: 1.

Estimated total annual burden hours: 236,800 hours.

Estimated total annual costs: \$21,280,921. This is the estimated burden cost; there is no cost for capital investment or maintenance and operational costs in this information collection.

Changes in the estimates from the last approval: The renewal of this ICR will result in an overall increase of 58,515 hours in the total estimated respondent burden identified in the currently approved ICR. This increase reflects EPA's updating of burden estimate to account for an increase from 103 to 137 in the estimated average number of tolerance petitions submitted annually, which resulted in a change to the annual burden hours for respondents from 178,285 in the previous renewal to 236,800 in the current renewal. This change is an adjustment.

V. What is the next step in the process for these ICRs?

EPA will consider the comments received and amend the individual ICRs as appropriate. The final ICR packages will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. EPA will issue another **Federal Register** document pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of these ICRs to OMB and the opportunity for the public to submit additional comments for OMB consideration. If you have any questions about any of these ICRs or the approval process in general, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.

ENVIRONMENTAL PROTECTION AGENCY

[EPA-HQ-OPP-2012-0631; FRL-9361-9]

Agency Information Collection Activities; Proposed Collection; Comment Request

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA), this document announces that EPA is planning to submit a request for a new Information Collection Request (ICR) to the Office of Management and Budget (OMB). This ICR is entitled: "Pesticide Spray Drift Reduction Technologies," and identified by EPA ICR No. 2472.01 and OMB Control No. 2070-NEW. Before submitting the ICR to OMB for review and approval, EPA is soliciting comments on specific aspects of the proposed information collection that is summarized in this document. The ICR and accompanying material are available in the docket for public review and comment.

DATES: Comments must be received on or before January 22, 2013.

ADDRESSES: Submit your comments, identified by docket identification (ID) number EPA-HQ-OPP-2012-0631 by one of the following methods:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the online

instructions for submitting comments. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

- **Mail:** OPP Docket, Environmental Protection Agency Docket Center (EPA/DC), (28221T), 1200 Pennsylvania Ave. NW., Washington, DC 20460-0001.

- **Hand Delivery:** To make special arrangements for hand delivery or delivery of boxed information, please follow the instructions at <http://www.epa.gov/dockets/contacts.htm>.

Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at <http://www.epa.gov/dockets>.

FOR FURTHER INFORMATION CONTACT:

Kathryn Boyle, Field and External Affairs Division, (7506P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460-0001; telephone number: (703) 305-6304; fax number: (703) 305-5884; email address: boyle.kathryn@epa.gov.

SUPPLEMENTARY INFORMATION:

I. What information is EPA particularly interested in?

Pursuant to PRA section 3506(c)(2)(A) (44 U.S.C. 3506(c)(2)(A)), EPA specifically solicits comments and information to enable it to:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility.
2. Evaluate the accuracy of the Agency's estimates of the burden of the proposed collection of information, including the validity of the methodology and assumptions used.
3. Enhance the quality, utility, and clarity of the information to be collected.
4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. In particular, EPA is requesting comments from very small businesses (those that employ less than 25) on examples of specific additional efforts that EPA could make to reduce the paperwork burden for very small businesses affected by this collection.

II. What information collection activity or ICR does this action apply to?

Affected entities: Entities potentially affected by the voluntary collection activities under this ICR include pesticide application equipment manufacturers, chemical manufacturers, pesticide registrants, university researchers, and others who have an interest in reducing spray drift. The North American Industrial Classification System (NAICS) code for the principal respondents is:

Producers of pesticide products	32532
Crop Production	111
Research and Development in the Physical, Engineering, Life Sciences	541710
Colleges, universities, and professional schools	611310

This listing is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be affected by this action.

Title: Pesticide Spray Drift Reduction Technologies.

ICR number: EPA ICR No. 2472.01.

OMB control number: OMB Control No. 2070-NEW.

ICR status: This ICR is for a new information collection activity. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the Code of Federal Regulations (CFR), after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers for certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: EPA intends to initiate a voluntary information collection for research to verify the effectiveness of application technologies for agricultural pesticide sprays that have the potential to significantly reduce pesticide spray drift. The focus of this research is on technologies, including spray nozzles, shrouds and shields, and drift reducing adjuvant chemicals used for aerial or groundboom applications to row and field crops. Collectively these technologies are referred to as drift reduction technologies (DRTs). The voluntary program would encourage the identification and use of DRTs that can substantially reduce drift of pesticide spray droplets from the target application site (e.g., a corn field) downwind to non-target areas.

Exposures and adverse effects to humans, wildlife, and crops and other vegetation from pesticide spray drift are well recognized. Published research suggests 1-10% or more of applied agricultural pesticide sprays drift from the target field. EPA believes there are application technologies that have the potential to significantly reduce the amount of spray drift. As these technologies are identified, their drift-reducing potential needs to be verified.

Burden statement: The average cost per response is \$10,476. Burden is defined in 5 CFR 1320.3(b).

The ICR, which is available in the docket along with other related materials, provides a detailed explanation of the collection activities and the burden estimate that is only briefly summarized here:

Estimated total number of potential respondents: 12 companies.

Frequency of response: On occasion.

Estimated total average number of responses for each respondent: 1 or 2 submissions by each company.

Estimated total annual costs: \$73,000. There are no costs for capital investment or maintenance and operational costs.

III. What is the next step in the process for this ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.
