

could price an option accurately for any option where the primary volume in the underlying security shifted to another market. Generally, the most volume in an equity security occurs on the market where the security is listed, such that the listing market is known as the "primary market" and Quoting Mechanisms use that market's process to price the overlying option, as described further below.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Phlx included statements concerning the purpose of and basis for the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Phlx filed the proposed rule change to correct an economic outcome caused when one particular specialist unit was unable to price an option accurately because of a unique situation where: (i) The key liquidity, the most volume and often the best market are other than on the market where the security is primarily listed; and (ii) the specialist unit's Quoting Mechanism is technologically tied to the price of the underlying security on its listed market. Specifically, the specialist unit was unable to secure technology changes to price the option using the "new" primary market quickly (as both the Exchange, respecting Auto-Quote, and outside vendors, respecting SQFs, could not make such extensive changes quickly and faced competing priorities); thus, the specialist unit has linked its failure to achieve the shortfall targets to these technology/pricing issues. Accordingly, this proposed rule change is limited in scope, and is intended to correct what the Exchange has determined is a limited, unfair outcome of its shortfall fee for this specific specialist unit.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,⁸ and furthers the

objectives of Section 6(b)(4) of the Act⁹ in particular, in that it is an equitable allocation of reasonable dues, fees and other charges. The Exchange believes that the proposal is reasonable and equitable because it is intended to correct a situation where the operation of its shortfall fee was incompatible with the technology available to price options, which caused an unfair and unintended fee result.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposal will impose any inappropriate burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

- A. By order approve such proposed rule change, or
- B. Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:
