

community and mainstream institutions of social integration, such as pre-prison employment within the labor market; their challenges and expectations for reentry back into the community as measured by SPI through the extent of substance abuse, mental health, and medical problems of prisoners, treatment they may have received for problems, programs in which they participated while in prison, and their motivation (*i.e.*, intrinsic or extrinsic) to participate in programs.

In addition to collecting the survey data, in an effort to minimize burden on facilities and inmates and to conduct future studies, inmates will be asked to provide consent to link their 2015–2016 SPI survey data to their criminal history records and any updates made to those records over the next 10 years. The administrative records will be used to augment the survey data and to conduct prospective recidivism studies of the 2015–2016 SPI sample of inmates who are released from prison within three to five years of completion of the survey. Inmates will also be asked to provide their Social Security number (SSN) to link their survey data to records from the Social Security Administration (SSA). The goal of this effort is to provide more detailed information about the pre-prison earnings and benefits of inmates without taking up more of their time during the interview.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* The 2015–2016 SPI consists of a pretest and a national study. The goal of the pretest is to test the functionality of the Computer Assisted Personal Interviewing (CAPI) instrument prior to fielding it on a national scale. The pretest will include one state and one federal correctional facility providing a roster of inmates at 0.5 hours per facility for a total of 1 hour; prison staff escorting 60 inmates to and from interview sites at 0.5 hours per inmate for a total of 30 hours; and 60 inmates responding to the questionnaire at 1.00 hours per interview for a total of 60 hours. The pretest will result in a total expected burden of approximately 91 hours. For the SPI national study, a maximum of 416 state and federal correctional facilities will provide a roster of inmates at 0.5 hours per facility for a total of 208 hours; prison staff will escort a maximum of 33,200 inmates to and from interview sites at 0.5 hours per inmate for a total of 16,600 hours; a maximum of 33,200 inmates will respond to the questionnaire at 1.00 hours per interview for a total of 33,200 hours; and a maximum of 50 state departments of corrections and the

Federal Bureau of Prisoners will provide post-survey follow-up information at 0.25 hours per jurisdiction for a total of 13 hours. The SPI national study will result in an expected maximum burden of approximately 50,021 hours.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The estimated total public burden is 50,112 annual hours.
