Type of Request: Extension without change of a currently approved information collection.

Abstract: The Agricultural Marketing Act of 1946 (7 U.S.C. 1621-1627) directs and authorizes the collection and dissemination of marketing information including adequate outlook information, on a market area basis, for the purpose of anticipating and meeting consumer requirements aiding in the maintenance of farm income and to bring about a balance between production and utilization.

As part of the Agricultural Marketing Service, the Transportation Services Division (TSD) provides insightful agricultural transportation information and analysis to help move agricultural products to market. TSD informs, represents, and assists agricultural shippers and government policymakers through: Market reports, representation, analysis, assistance, and responses to inquiries. TSD collects data for its analysis from public resources as well as unique data sources to help the agricultural exporters make the most out of the transportation options available.

The Data Collection for Container Availability provides U.S. agricultural exporters with weekly data detailing the availability of containers at 18 select locations around the country. AMS collects these data on a voluntary basis

from ocean container carriers and then provides these up-to-date data in an aggregate report on its Web site. The goal of the report is to provide more transparency in the market for the location and availability of marine shipping containers for U.S. exporters.
