These specifications cover a variety of materials and equipment, ranging from multipair cables for direct burial in the earth, to highly sophisticated, computerized central office digital switches. Manufacturers wishing to sell their products to USDA Rural Development borrowers, request USDA Rural Development consideration for acceptance of their products and submit data demonstrating their products' compliance with USDA Rural Development specifications and that the products are otherwise acceptable for use on rural telecommunications systems. The review and determination of product acceptability is made to help assure that the products will perform properly and provide service lives that assure reliable revenue incomes and repayment of USDA Rural Development loans funds in a manner consistent with the terms and conditions of the USDA Rural Development loan. Unacceptable products may fail prematurely and interrupt service, require costly replacements, and reduce revenues. Without this collection, USDA Rural Development has no means of determining the acceptability of
