Service not to assess antidumping duties on entries of the subject merchandise by MAN Roland Druckmaschinen AG covered by this review. Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: October 9, 2001.

SUPPLEMENTARY INFORMATION:

Period of Review

The period of review (POR) is September 1, 1999 through August 31, 2000.

The Applicable Statute

Unless otherwise indicated, all citations to the Tariff Act of 1930, as amended (the Act), are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Act by the Uruguay Round Agreements Act (URAA). In addition, unless otherwise indicated, all citations to the Department of Commerce's (the Department's) regulations are to 19 CFR part 351 (April 2000).

Background

On July 23, 1996, the Department published in the **Federal Register**, 61 FR 38166, the final affirmative antidumping duty determination on large newspaper printing presses and components thereof, whether assembled or unassembled (LNPP), from Germany. We published an antidumping duty order on September 4, 1996 (61 FR 46623).

On September 20, 2000, the Department published in the **Federal Register** a notice advising of the opportunity to request an administrative review of this order for the period September 1, 1999, through August 31, 2000 (65 FR 56868). The Department received requests for an administrative review of MAN Roland Druckmaschinen AG and its U.S. affiliate MAN Roland Inc. (collectively MAN Roland).

On September 29, 2000, Goss Graphic Systems, Inc. (the petitioner) requested that the Department determine whether antidumping duties have been absorbed by KBA or MAN Roland. On April 20, 2001, the Department requested proof that unaffiliated purchasers will ultimately pay the antidumping duties to be assessed on entries during the

review period. See discussion in the "Duty Absorption section," below.

On October 10, 2000, the petitioner requested that the Department defer for one year the initiation of its review of entries by KBA subject to the above-referenced order covering the period September 1, 1999, to August 31, 2000. On October 30, 2000, we granted the petitioner's request to defer the review of KBA's entries, as well as initiated a review of MAN Roland. See *Initiation of Antidumping Duty and Countervailing Duty Administrative Reviews, Requests for Revocation in Part, and Deferral of Administrative Reviews*, 65 FR 64662.

On October 27, 2000, we issued an antidumping questionnaire to MAN Roland. We received a response on February 5, 2001. We issued supplemental questionnaires in April and August 2001, and received responses in May and September 2001.

On March 22, 2001, the Department extended the time limit for the preliminary results in this review until October 1, 2001. See *Large Newspaper Printing Presses, and Components Thereof, from Germany and Japan: Notice of Extension of Time Limits for Antidumping Duty Administrative Reviews*, 66 FR 16040.

Scope of the Order

The products covered by the order are large newspaper printing presses, including press systems, press additions and press components, whether assembled or unassembled, whether complete or incomplete, that are capable of printing or otherwise manipulating a roll of paper more than two pages across. A page is defined as a newspaper broadsheet page in which the lines of type are printed perpendicular to the running of the direction of the paper or a newspaper tabloid page with lines of type parallel to the running of the direction of the paper.

In addition to press systems, the scope of the order includes the five press system components. They are: (1) A printing unit, which is any component that prints in monochrome, spot color and/or process (full) color; (2) a reel tension paster (RTP), which is any component that feeds a roll of paper more than two newspaper broadsheet pages in width into a subject printing unit; (3) a folder, which is a module or combination of modules capable of cutting, folding, and/or delivering the paper from a roll or rolls of newspaper broadsheet paper more than two pages in width into a newspaper format; (4) conveyance and access apparatus capable of manipulating a roll of paper more than two newspaper broadsheet pages across through the production
