Abstract of Information Available

A total of two cultural items have been requested for repatriation. The two unassociated funerary objects are one lot of nickel silver brooches and one lot of shell and glass beads. On an unknown date in 1913, two lots of Cultural Items were removed from the Ft. Wayne site in Allen Co, Indiana on the property of Dr. Gillis, Lawton Place, and donated to the University of Michigan Museum of Anthropological Archaeology (UMMAA) by Mrs. Gertrude E. Dean on June 19, 1936. UMMAA records note "a sword with the burial. Someone in Wash. D. C. got most of the material . . . silver crosses and arm bands." The site is dated to the post-contact A.D. 1700-1850 based on diagnostic artifacts. This location is known to be the burial site of the Miami leader, Little Turtle. The University of Michigan has no record of, nor do its officials have any knowledge of, any treatment of items with pesticides, preservatives, or other

substances that represent a potential hazard to the collection(s) or to persons handling the collection(s).

Determinations

The University of Michigan has determined that:

- The two unassociated funerary objects described in this notice are reasonably believed to have been placed intentionally with or near human remains, and are connected, either at the time of death or later as part of the death rite or ceremony of a Native American culture according to the Native American traditional knowledge of a lineal descendant, Indian Tribe, or Native Hawaiian organization. The unassociated funerary objects have been identified by a preponderance of the evidence as related to human remains, specific individuals, or families, or removed from a specific burial site or burial area of an individual or individuals with cultural affiliation to an Indian Tribe or Native Hawaiian organization.

- The known lineal descendants, Daryl Baldwin (Miami Tribe of Oklahoma) and Scott Willard (Miami Tribe of Oklahoma), are connected to the cultural items described in this notice.

Requests for Repatriation

Additional, written requests for repatriation of the cultural items in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the cultural items in this notice to a requestor may occur on or after July 11, 2024. If competing requests for repatriation are received, the University of Michigan must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the cultural items are considered a single request and not competing requests. The University of Michigan is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice and to any other consulting parties.

Abstract of Information Available

Human remains representing, at least, one individual have been identified. The one associated funerary object is a bone awl. The human remains were

removed from the burial site in San Miguel County, CO, in 1983 after the site (5SM790) had been vandalized sometime during the winter of 1982–1983. The burial appeared to be a cairn burial, comprised of about 20 sandstone cobbles and two groundstone slabs, within a rockshelter. A detailed assessment of the human remains was made by archaeologists in 1983 and in 1994, who determined the individual was of Native American descent. The human remains belong to an adult female. With the exception of the right arm and hand, one lumbar vertebra, and rib fragments, the upper portion of the body was completely missing. Based upon the burial context, as well as a radiocarbon date from charcoal included in the burial pit (A.D. 460 ± 140), the site is reasonably believed to be from, in archaeological terms, the late Archaic or Formative period.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is reasonably identified by the geographical location of the human remains and associated funerary object described in this notice.

Determinations

The BLM Canyons of the Ancients Visitors Center and Museum has determined that:

- The human remains described in this notice represent the physical remains of one individual of Native American ancestry.
- The one object described in this notice is reasonably believed to have been placed intentionally with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- There is a connection between the human remains and associated funerary objects described in this notice and the Hopi Tribe of Arizona; Ohkay Owingeh, New Mexico; Pueblo of Acoma, New Mexico; Pueblo of Cochiti, New Mexico; Pueblo of Isleta, New Mexico; Pueblo of Jemez, New Mexico; Pueblo of Laguna, New Mexico; Pueblo of Nambe, New Mexico; Pueblo of Picuris, New Mexico; Pueblo of Pojoaque, New Mexico; Pueblo of San Felipe, New Mexico; Pueblo of San Ildefonso, New Mexico; Pueblo of Sandia, New Mexico; Pueblo of Santa Ana, New Mexico; Pueblo of Santa Clara, New Mexico; Pueblo of Taos, New Mexico; Pueblo of Tesuque, New Mexico; Pueblo of Zia, New Mexico; Santo Domingo Pueblo; Southern Ute Indian Tribe of the Southern Ute Reservation, Colorado; Ute Indian Tribe of the Uintah & Ouray Reservation, Utah; Ute Mountain Ute

Tribe; Ysleta del Sur Pueblo; and the Zuni Tribe of the Zuni Reservation, New Mexico.

Repatriation of the human remains and associated funerary objects in this notice to a requestor may occur on or after July 11, 2024.
