The point was that government needed to work with the private sector to make sure the systems so crucial to our way of life were adequately protected, and if attacked by terrorists or overwhelmed by natural forces, were able to recover quickly and restore services.").

Congress explicitly instructed the Department to create an effective structure for sharing sensitive information with the private sector on infrastructure. Congress also explicitly mandated that the Department "ensure the security and confidentiality" of sensitive homeland security information, and gave the Department specific new authorities to protect such
