The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act of 1995, Public Law 104-13.

Bureau: International Trade Administration (ITA).

Title: Advocacy Comment Card.

Agency Form Number: None.

OMB Number: 0625-0251.

Type of Request: Regular submission.

Burden: 54 hours.

Number of Respondents: 650.

Average Hours Per Response: 5 minutes.

Needs and Uses: The International Trade Administration's U.S. Commercial Service (USCS) is mandated by Congress to help U.S. businesses, particularly small- and medium-sized companies, export their products and services to global markets. As part of its mission, the USCS uses "Comment Cards" to collect feedback from the U.S. business clients it serves. The surveys request the client to evaluate the USCS on its customer service provision. The results from the surveys are used to make improvements to the agency's business processes in order to provide better and more effective export assistance to U.S. companies. The purpose of the survey is to collect feedback from U.S. businesses that receive advocacy services from the USCS. In providing these services, the USCS advocates on behalf of a U.S. company that is bidding on a project or government contract, attempting to recover payment or goods, or facing a barrier to market entry.

SUPPLEMENTARY INFORMATION:

I. Abstract

The U.S. Census Bureau plans to extend the current OMB clearance for

the Survey of Industrial Research and Development (R&D). The survey has been conducted annually since 1953. The information collection involves the estimation of the expenditures on research and development performed within the United States by industrial firms.

Industry accounts for over 70 percent of total U.S. R&D each year and since its inception, the survey has provided continuity of statistics on R&D expenditures by major industry groups and by source of funds. The survey is the industrial component of the National Science Foundation (NSF) statistical program that seeks " * * * to provide a central clearinghouse for the collection, interpretation, and analysis of data on scientific and engineering resources and to provide a source of information for policy formulation by other agencies of the Federal government, as mandated in the National Science Foundation Act of 1950." Statistics from the survey will be released by the Census Bureau and published in NSF's annual publication series Research and Development in Industry. The proposed collection will continue the survey for three years.

II. Method of Collection

The Census Bureau will use mail out/mail back survey forms to collect the data and will also offer an electronic version of the form via the Internet. Companies will be asked to respond within 30 days (RD-1A) or 60 days (RD-1) of initial mailing. This due date will be imprinted at the top of the form. Letters encouraging participation will be mailed to companies that have not responded by the designated time.

III. Data

SUPPLEMENTARY INFORMATION:

I. Abstract

The Local Update of Census Addresses (LUCA) Program was developed by the U.S. Census Bureau to meet the requirements of the Census Address List Improvement Act of 1994, Public Law 103-430. The Census Bureau will use the LUCA program to help develop the housing unit and group quarters (e.g., college dormitory, nursing home, correctional facility, etc.) address information that it will need to conduct the 2010 Decennial Census. Under the voluntary LUCA Program, participating governments may review the Census Bureau's confidential list of individual living quarters addresses and provide to the Census Bureau address additions, corrections, deletions, and/or the identification of corrected address counts for census blocks; street and street attribute updates; and legal boundary updates. Governments electing to participate in the LUCA program also provide program contact information, certification of their agreement to maintain the confidentiality of the Census Bureau address information, responses regarding their physical and information technology security capabilities, program option and product media preference information, shipment inventory information, and certification of their return/destruction of materials containing confidential data. The program will be available to tribal, state, and local governments, and the District of Columbia and Puerto Rico (or their designated representatives) in areas for which the Census Bureau performs a precensus address canvassing operation (excluded are sparsely settled areas in the states of Alaska and Maine). The LUCA program includes federally recognized American Indian tribes with reservations and/or off-reservation trust lands, states, and general-purpose local governments, such as cities and townships, for which the Census Bureau reports data. This information collection will occur between August 2007 and April 2008.

II. Method of Collection

The information on address additions, corrections, deletions, and/or the identification of corrected address counts for census blocks is collected, at the participating government's option, in the form of:

- Handwritten annotations to printed address listings (for governments with 6,000 or fewer addresses); or
- Electronic data files formatted to Census Bureau specifications; or
- Electronic data files output by the MAF/TIGER Partnership Software, a

desktop computer application supplied free-of-charge to LUCA Program participants that permits the review and update of Census Bureau address and map information.

The information on street and street attribute updates as well as legal boundary updates is collected, at the participating government's option, in the form of:

- Handwritten annotations on Census Bureau-supplied paper maps; or
- Electronic updates to Census Bureau-supplied digital shape files; or
- Shape files output by the MAF/TIGER Partnership Software, a desktop computer application supplied free-of-charge to LUCA Program participants that permits the review and update of Census Bureau address and map information.

The information on the program contacts, certification of agreement to maintain the confidentiality of the Census Bureau address information, physical and information technology security capabilities, program option and product media preferences, shipment inventory, and certification of the return/destruction of materials containing confidential data is collected via the completion of printed paper forms.
