Major Issues Raised by Indonesia

On April 8, 2010, USTR received a letter from Indonesia requesting consultations regarding a provision of the Family Smoking Prevention and Tobacco Control Act (Pub. L. 111-31) (the "Act"), which was signed into law June 22, 2009. Indonesia alleges that, among other things, the Act bans the production or sale in the United States of cigarettes containing certain additives, including clove, but would continue to permit the production and sale of other cigarettes, including cigarettes containing menthol, beginning 90 days after the legislation was signed into law. Indonesia appears to allege that this provision of the Act are inconsistent with the General Agreement on Tariffs and Trade 1994, Articles III:4 and XX; the Agreement on the Application of Sanitary and Phytosanitary Measures, Articles 2, 3, 5

and 7; and the Agreement on Technical Barriers to Trade, Articles 2 and 12.

Background

On March 22, 2010, FMCSA published a Notice of receipt of Federal diabetes exemption applications from fifty-three individuals and requested comments from the public (75 FR 13647). The public comment period closed on April 21, 2010, and one comment was received.

FMCSA has evaluated the eligibility of the fifty-three applicants and determined that granting the exemptions to these individuals would achieve a level of safety equivalent to, or greater than, the level that would be achieved by complying with the current regulation 49 CFR 391.41(b)(3).

Diabetes Mellitus and Driving Experience of the Applicants

The Agency established the current standard for diabetes in 1970 because several risk studies indicated that diabetic drivers had a higher rate of crash involvement than the general population. The diabetes rule provides that "A person is physically qualified to drive a commercial motor vehicle if that person has no established medical history or clinical diagnosis of diabetes mellitus currently requiring insulin for control" (49 CFR 391.41(b)(3)).

FMCSA established its diabetes exemption program, based on the Agency's July 2000 study entitled "A Report to Congress on the Feasibility of a Program to Qualify Individuals with Insulin-Treated Diabetes Mellitus to Operate in Interstate Commerce as Directed by the Transportation Act for the 21st Century." The report concluded that a safe and practicable protocol to allow some drivers with ITDM to operate CMVs is feasible. The September 3, 2003 (68 FR 52441) **Federal Register** Notice in conjunction with the November 8, 2005 (70 FR 67777) **Federal Register** Notice provides the current protocol for allowing such drivers to operate CMVs in interstate commerce.

These fifty-three applicants have had ITDM over a range of 1 to 53 years. These applicants report no
