Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

l. *Description of Request*: The purpose of the project is to restore the Lower Feeley Lake Dam (Carr Lake) Crest to its original design elevation and associated upstream toe along with enhanced protection to the upstream slope. A variance in the minimum flows required by Article 39 is necessary to facilitate the work. Approving the variance would allow the licensee to reduce flows released from the Lower Feeley Dam from the required flow of 0.5 cubic-feet-per-second (cfs) target to a 0.4 cfs target and reduce the allowable minimum flow from 0.2 cfs to 0.1 cfs. The described reduction in flows would be permitted from the onset of variance approval by the Commission, if approved, until November 30, 2024.
