

Bering Sea and Aleutian Islands Area (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

The 2003 red king crab bycatch allowance specified for Zone 1 of the BSAI trawl yellowfin sole fishery category, which is defined at § 679.21(e)(3)(iv)(B)(1), is 16,664 animals (68 FR 9907, March 3, 2003).

In accordance with § 679.21(e)(7)(ii), the Administrator, Alaska Region, NMFS (Regional Administrator), has determined that the 2003 bycatch allowance of red king crab specified for the trawl yellowfin sole fishery in Zone 1 of the BSAI has been reached. Consequently, the Regional Administrator is closing directed fishing for yellowfin sole by vessels using trawl gear in Zone 1 of the BSAI.

Maximum retainable amounts may be found in the regulations at § 679.20(e) and (f).

Classification

This action responds to the best available information recently obtained from the fishery. The Assistant Administrator for Fisheries, NOAA (AA), finds good cause to waive the requirement to provide prior notice and opportunity for public comment pursuant to the authority set forth at 5 U.S.C. 553(b)(B) as such requirement is contrary to the public interest. This requirement is contrary to the public interest as it would delay the closure of the fishery, lead to exceeding the 2003 bycatch allowance of red king crab specified for the trawl yellowfin sole fishery in Zone 1 of the BSAI, and therefore reduce the public's ability to use and enjoy the fishery resource.

The AA also finds good cause to waive the 30-day delay in the effective date of this action under 5 U.S.C. 553(d)(3). This finding is based upon the reasons provided above for waiver of prior notice and opportunity for public comment.

This action is required by 50 CFR 679.21 and is exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: May 21, 2003.

Bruce C. Morehead,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

National Oceanic and Atmospheric Administration

50 CFR Part 679

[Docket No. 030128021-3124-02; I.D. 121602A]

RIN: 0648-AQ45

Fisheries of the Exclusive Economic Zone Off Alaska; Opening Waters to Pacific Cod Pot Fishing off Cape Barnabas and Caton Island

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: NMFS issues a final rule to allow use of pot gear in waters around Cape Barnabas and Caton Island located in the Gulf of Alaska (GOA) for directed fishing for Pacific cod. Waters within 3 nautical miles (nm) of these sites currently are closed to Pacific cod fishing by vessels using pot gear and named on a Federal fisheries permit. This action is necessary to provide consistency between State and Federal fishing restrictions and to relieve a potential burden on the Pacific cod pot gear fishing sector. This final rule is intended to meet the objectives in the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act) and to further the goals and objectives of the Fishery Management Plan for Groundfish of the Gulf of Alaska (FMP).

DATES: Effective June 27, 2003.

ADDRESSES: Copies of the Environmental Assessment/Regulatory Impact Review/Initial Regulatory Flexibility Analysis (EA/RIR/IRFA) prepared for this action and the Final Regulatory Flexibility Analysis (FRFA) may be obtained from NMFS, Alaska Region, P.O. Box 21668, Juneau, AK 99802-1668, Attn: Lori Durall, or by calling (907) 586-7228.

FOR FURTHER INFORMATION CONTACT: Melanie Brown, (907) 586-7228 or melanie.brown@noaa.gov.

SUPPLEMENTARY INFORMATION: NMFS manages the domestic groundfish fisheries of the GOA under the FMP. The North Pacific Fishery Management Council (Council) prepared the FMP under the Magnuson-Stevens Act. Regulations governing the groundfish fisheries of the GOA appear at 50 CFR parts 600 and 679.

The background regarding this action, including the Steller sea lion protection

measures, the Council action, U. S. District Court orders, and the State of Alaska fishery restrictions, is detailed in the preamble to the proposed rule (68 FR 7750, February 18, 2003). This final rule removes restrictions on using pot gear for directed fishing for Pacific cod by vessels named on a Federal groundfish fishing permit in waters within 3 nm of Cape Barnabas and Caton Island. Accordingly, Table 5 to part 679 is revised by removing the 3 nm restriction in column 9 for Caton Island and Cape Barnabas.

No comments were received on the proposed rule.

Changes in the Final Rule From the Proposed Rule

This final rule revises Table 5 to part 679 from the proposed rule. Since the proposed rule was published on February 18, 2003, (68 FR 7750), NMFS published a correction to the Steller sea lion protection measures (SSL correction) at 68 FR 24615, May 08, 2003. The corrections to Table 5 in the SSL correction were not included in the proposed rule for this action. To ensure the corrections to Table 5 from the SSL correction remain in the Code of Federal Regulations, Table 5 in this final rule is revised from the proposed rule to include those revisions that were published in the SSL correction. For details on these revisions, see the preamble to the SSL correction (68 FR 24615).

Classification

The Administrator, Alaska Region, NMFS has determined that removing restrictions on directed fishing for Pacific cod using pot gear within 3 nm of Caton Island and Cape Barnabas is necessary for the conservation and management of the Pacific cod pot gear fishery and is consistent with the Magnuson-Stevens Act and other applicable laws.

This final rule has been determined to be not significant for purposes of Executive Order 12866.

Species listed under the Endangered Species Act (ESA) are present in the action area. This action is not expected to result in increases of Pacific cod harvest beyond those experienced with the opening of the State parallel fishery in these areas. With no additional removals of Pacific cod expected, informal ESA consultation completed on December 11, 2001, concluded that this action is not likely to adversely affect listed species or critical habitat.

NMFS has prepared a FRFA for this action pursuant to Section 604(a) of the Regulatory Flexibility Act. The need for and objectives of this action have been

discussed earlier in detail in the preamble to the proposed rule (68 FR 7750, February 18, 2003).

NMFS prepared an IRFA that describes the impact this action may have on small entities. This action is necessary to provide consistency between State and Federal fishing restrictions and to relieve a potential burden on the Pacific cod pot gear fishing sector. This action is expected to affect six regulated small entities by removing a fishing restriction. These entities are the pot vessels fishing for Pacific cod in the waters within 3 nm of the two haulouts. This action does not impose new reporting, recordkeeping or other compliance requirements on regulated small entities. No Federal rules exist that duplicate, overlap or conflict with the proposed rule. This action does not have any adverse impacts on regulated small entities. No significant alternatives to the proposed rule exist that would have lower economic impacts on these entities.

Two alternatives were considered for the Caton Island and Cape Barnabas pot fishing vessels: (1) No exemption for these vessels (status quo) and (2) exempt pot fishing vessels from SSL closures from 0 to 3 nm around Caton Island and Cape Barnabas. Alternative 1 is the baseline alternative, and federally permitted vessels using pot gear for Pacific cod directed fishing would continue to be prohibited from fishing within 3 nm of the Caton Island and Cape Barnabas haulouts. Also, the status quo would not provide consistency between Federal and State regulations governing fishing restrictions within Steller sea lion protection areas. The preferred alternative would allow federally-permitted vessels used to participate in the GOA Pacific cod pot fishery to fish within 3 nm of the haulouts at Caton Island and Cape Barnabas. This would reduce the Pacific cod revenues placed "at risk" by the restrictions of the status quo alternative by up to \$63,000. The areas in question are small parts of larger fishing areas, and fishermen may currently be making up a large part of the harvest foreclosed by the restrictions by fishing elsewhere. This alternative is not believed to create jeopardy for the Steller sea lions or adversely modify its critical habitat. This alternative would not trigger Executive Order 12866 significance criteria since the maximum revenue impact is likely to be \$63,000 at the outside.

NMFS Alaska Fisheries Science Center (AFSC) data show that, in 2000, 252 pot catcher vessels and four pot catcher/processors fished for groundfish

in the GOA. The numbers fishing near the waters that are opened under this action are smaller. An examination of the numbers of vessels fishing for Pacific cod with pot gear in state waters within the South Peninsula management area (the location of the Caton Island haulout) found 31 in 1999 and 51 in 2000. An examination of the numbers fishing in the Kodiak management area (the location of the Cape Barnabas haulout) found 41 in 1999 and 44 in 2000. An estimated six vessels actually fished within the Caton Island and Cape Barnabas haulouts in each of those years. Information on gross revenues from the AFSC indicates that all vessels fishing for Pacific cod with pots in the GOA are classified as small entities according to Small Business Administration criteria.

At its October 2001 meeting, the Council recommended SSL protection measures for 2002 and beyond. These measures were developed by a Council-appointed committee. In developing its recommendations, the SSL Committee first assessed the needs of Steller sea lions to avoid jeopardy or destruction or adverse modification of their critical habitat based on the best scientific information available. The SSL Committee then crafted groundfish fisheries management measures that first provided protection for Steller sea lions. If some flexibility existed, the measures were crafted to minimize adverse economic impacts to affected fishermen and fishing communities, as long as protection for Steller sea lions was maintained, as required by the ESA.

These recommendations included a revised harvest control rule for pollock, Pacific cod, and Atka mackerel; closed areas and seasons based on the location, fishery, and gear type; critical habitat harvest limits for the pollock and Atka mackerel fisheries in certain areas of critical habitat; and requirements to allow for monitoring of pollock, Pacific cod, and Atka mackerel directed fishing. The recommendations of the SSL Committee were further modified by the Council.

In November 2001, the Alaska Board of Fisheries (BOF) reviewed the Council's recommendation for Steller sea lion protection measures. These measures generally consist of fishery or gear specific directed fishing closures within 3, 10, or 20 nautical miles (nm) of Steller sea lion rookeries or haulouts. NMFS and the Council expected that the BOF would mirror these regulations in State waters during the parallel fisheries for pollock, Atka mackerel, and Pacific cod. This is necessary to implement the protection measures that

included fishery prohibitions that extended into State waters.

The BOF responded by authorizing the Commissioner of the Alaska Department of Fish and Game, through emergency order, to open and close seasons and areas as necessary to mirror federal regulations for the purpose of protecting Steller sea lions. However, the BOF did provide two exemptions for vessels fishing for Pacific cod with pot gear around the Caton Island and Cape Barnabas haulouts.

The two exceptions in the parallel fishery would allow directed fishing for Pacific cod with pot gear between 0–3 nm of the Caton Island and Cape Barnabas haulouts. The proposed action recommended by the Council, and assessed in the 2001 Biological Opinion (BiOp), closed 0–3 nm to all gear types except vessels using jig gear. Thus, the BOF action authorizes pot gear fishing within 0–3 nm of two haulouts that was not considered or assessed in the 2001 BiOp.

The rationale stated by the BOF for this discrepancy was that few animals have been seen at these two sites over the last decade; these sites are haulouts instead of rookeries; and that other sites in the region would remain closed to pot gear fishing inside 3 nm of haulouts. Hook-and-line gear was not included in the exemption because this gear type is not authorized in the State-managed Pacific cod fishery.

Because the BOF action did not contain these Caton Island and Cape Barnabas closures, the SSL protection measures under state regulations were not consistent with Federal rules because they allowed vessels without a federal fishing permit to fish in those areas under Alaska State law. This resulted in conflicting Federal and State regulations, as well as being different from the action that was consulted on under the ESA. In November, 2001, NMFS informally consulted on these changes and determined that they were not of sufficient extent to re-initiate formal consultation under the ESA. NMFS informed the Council at its February 2002 meeting that no new scientific analyses were necessary in order to consider the BOF action on GOA haulouts, therefore, the Council requested that an analysis be developed immediately for an action to remove fishing restrictions around these sites.

A copy of the FRFA is available from NMFS (see ADDRESSES).

List of Subjects in 50 CFR Part 679

Alaska, Fisheries, Recordkeeping and reporting requirements.

Dated: May 21, 2003.

¹Where two sets of coordinates are given, the baseline extends in a clock-wise direction from the first set of geographic coordinates along the shoreline at mean lower-low water to the second set of coordinates. Where only one set of coordinates is listed, that location is the base point.

² Closures as stated in 50 CFR 679.22(a)(7)(v), (a)(8)(iv) and (b)(2)(iii).

³ No-fishing zones are the waters between 0 nm and the nm specified in columns 7, 8, and 9 around each site and within the Bogoslof area (BA) and the Seguam Foraging Area (SFA).

⁴ Some or all of the restricted area is located in the SFA which is closed to all gears types. The SFA is established as all waters within the area between 52° N lat. and 53° N lat. and between 173°30' W long. and 172°30' W long. Amalia I./East, and Tanadak I. (Amalia) haulouts 20 nm hook-and-line and pot closures apply only to waters located east of 173° W longitude.

⁵This site lies within the BA which is closed to all gear types. The BA consists of all waters of area 518 as described in Figure 1 of this part south of a straight line

connecting 55°00'N/170°00'W, and 55°00' N/168°11'4.75" W.

⁶Hook-and-line no-fishing zones apply only to vessels greater than or equal to 60 feet LOA in waters east of 167° W long. For Bishop Point the 10 nm closure west of 167° W long. applies to all hook and line and jig vessels.

⁷The trawl closure between 0 nm to 10 nm is effective from January 20 through June 10. Trawl closure between 0 nm to 3 nm is effective from September 1 through November 1.

⁸The trawl closure between 0 nm to 15 nm is effective from January 20 through June 10. Trawl closure between 0 nm to 20 nm is effective from September 1 through November 1.

⁹Restriction area includes only waters of the Gulf of Alaska Area.

¹⁰Contact the Alaska Department of Fish and Game for fishery restrictions at these sites.

¹¹Directed fishing for Pacific cod using trawl gear is prohibited in the harvest limit area (HLA) as defined at § 679.2 until the HLA Atka mackerel directed fishery in the A or B seasons is completed. The 20 nm closure around Gramp Rock and Tanaga I./Bumpy Pt. applies only to waters west of 178°W long. and only during the HLA directed fishery. After closure of the Atka mackerel HLA directed fishery, directed fishing for Pacific cod using trawl gear is prohibited in the HLA between 0 nm to 10 nm of rookeries and between 0 nm to 3 nm of haulouts. Directed fishing for Pacific cod using trawl gear is prohibited between 0-3 nm of Tanaga I./Bumpy Pt.

¹²The 20 nm closure around this site is effective only in waters outside of the State of Alaska waters of Prince William Sound.

¹³See 50 CFR 679.22(a)(7)(i)(C) for exemptions for catcher vessels less than 60 feet (18.3 m) LOA using jig or hook-and-line gear between Bishop Point and Emerald Island closure areas.

¹⁴Trawl closure around this site is limited to waters east of 170°00' W long. Closure to hook-and-line fishing around Chuginadak is 20 nm for waters west of 170°W long. and 10 nm for waters east of 170°W long.
