

at his or her discretion if it is determined that the basic model for which the petition for waiver was submitted contains one or more design characteristics that prevents testing of the basic model according to the prescribed test procedures, or if the prescribed test procedures may evaluate the basic model in a manner so unrepresentative of its true energy consumption characteristics as to provide materially inaccurate comparative data. The Department currently uses and will continue to use the information submitted in the application for a waiver as the basis for granting or denying the petition. See 10 CFR 430.27 for additional information on petitions for waivers and for consumer products. See 10 CFR 431.401 for additional information on petitions for waivers for commercial equipment.

DOE also allows manufacturers of both consumer products and/or commercial equipment to submit applications requesting an extension of the date by which representations must be made in accordance with any new or amended DOE test procedure. DOE may grant extensions of up to 180 days if it determines that making such representations would impose an undue hardship on the petitioner. The Department currently uses and will continue to use the information submitted in these applications as the basis for granting or denying the petition.

In addition to the FTC labeling requirements for consumer products discussed, EPCA directs DOE to establish labeling requirements for covered industrial and commercial equipment when specified criteria is met. If the Department has prescribed test procedures for any class of covered equipment, a labeling rule applicable to such class of covered equipment must be prescribed. (42 U.S.C. 6315(a)) EPCA, however, requires that certain criteria must be met prior to DOE prescribing a given labeling rule. Specifically, DOE must determine that: (1) Labeling is technologically and economically feasible with respect to any particular equipment class; (2) significant energy savings will likely result from such labeling; and (3) labeling is likely to assist consumers in making purchasing decisions. (42 U.S.C. 6315(h)) DOE has established labeling requirements under the authority in 42 U.S.C. 6315 for electric motors (10 CFR 431.31), walk-in coolers and freezers (10 CFR 431.305), and pumps (10 CFR 431.466).

(5) *Annual Estimated Number of Respondents*: 2,000;

(6) *Annual Estimated Number of Total Responses*: 20,000;

(7) *Annual Estimated Number of Burden Hours*: 773,060 (35 hours per certification, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information; 16 additional hours for creating supplement testing instructions for commercial HVAC, water heating, and refrigeration equipment manufacturers; 160 hours for test procedure waiver preparation; 160 hours for representation extension request preparation; 1 hour for creating and applying a label for walk-in cooler and freezer, commercial and industrial pump, and electric motor manufacturers);

(8) *Annual Estimated Reporting and Recordkeeping Cost Burden*: \$77,306,000.

[Docket No. CP21–44–000]

LA Storage, LLC; Notice of Application and Establishing Intervention Deadline

Take notice that on January 29, 2021, LA Storage, LLC (LA Storage), 1500 Post Oak Blvd., Suite 1000, Houston, Texas 77056, filed in the above referenced docket an application pursuant to section 7(c) of the Natural Gas Act (NGA) and Parts 157 and 284 of the Commission's regulations to construct and operate a new natural gas storage and transmission facilities (the Hackberry Storage Project) located in Cameron and Calcasieu Parishes, Louisiana. Specifically, LA Storage request to convert three existing salt dome caverns to natural gas storage service and develop one new salt dome cavern, as well as construct approximately 11.1 miles of 42-inch diameter natural gas pipeline, compression, and appurtenant facilities. LA Storage request the approval of market-based rates for the Hackberry Storage project, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

LA Storage's application states that a water quality certificate under section 401 of the Clean Water Act is required for the project from the Louisiana Department of Environmental Quality. The request for certification must be submitted to the certifying agency and to the Commission concurrently. Proof of the certifying agency's receipt date must be filed no later than five (5) days after the request is submitted to the certifying agency.
