

However, price limits, by their very nature, prevent futures markets from discovering the market price at times when market participants would most like to have that price information (i.e. after a major news release or other event). Widening daily price limits will allow the agricultural and metals futures markets to better reflect cash price movements and will provide greater access for market users during periods of uncertainty.

The CBOT also said that:

The proposed increases in price limits will increase the probability that the futures markets will continue to trade and provide a price discovery function following a major news release or unexpected event. This in turn will provide the marketplace with a benchmark price from which to base cash prices and production, marketing and buying decisions.
