BILLING CODE 4140-01-P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

[Docket No. USCG-2022-0274]

Certificate of Alternative Compliance for the CGMA CGM DAKA

AGENCY: Coast Guard, DHS.

ACTION: Notification of issuance of a certificate of alternative compliance.

SUMMARY: The Coast Guard announces that the U.S. Coast Guard Fourteenth District Prevention Division has issued a certificate of alternative compliance from the International Regulations for Preventing Collisions at Sea, 1972 (72 COLREGS), for the CGMA CGM DAKA (IMO 9436070). We are issuing this notice because its publication is required by statute. Due to the construction and placement of the forward cargo crane creating a blind sector 1,000 meters immediately ahead of the bow of the vessel over a range of approximately 1–2 degrees, CGMA CGM DAKA cannot fully comply with the light, shape, or sound signal provisions of the 72 COLREGS without interfering with the vessel's design and construction. This notification of issuance of a certificate of alternative compliance promotes the Coast Guard's marine safety mission.

DATES: The Certificate of Alternative Compliance was issued on 14 February 2022.

FOR FURTHER INFORMATION CONTACT: For information or questions about this notice call or email Mr. George Butler, District Fourteen (dpi), U.S. Coast Guard; (808) 535-3415, George.E.Butler@USCG.mil.

SUPPLEMENTARY INFORMATION: The United States is signatory to the International Maritime Organization's International Regulations for Preventing Collisions at Sea, 1972 (72 COLREGS), as amended. The special construction or purpose of some vessels makes them unable to comply with the light, shape, or sound signal provisions of the 72 COLREGS. Under statutory law¹ and Coast Guard regulation,² a vessel's owner, builder, operator, or agent may

¹ 33 U.S.C. 1605(c).

² 33 CFR 81.3.

apply for a certificate of alternative compliance (COAC) and may instead meet alternative requirements.³

For vessels of special construction or purpose, the cognizant Coast Guard District Office in which the vessel is being built or operated determines whether the vessel for which the COAC is sought complies as closely as possible with the 72 COLREGS, and the Chief of the Prevention Division decides whether to issue the COAC which must specify the required alternative installation. If the Coast Guard issues a COAC, under the governing statute⁴ and regulations,⁵ the Coast Guard must publish notice of this action. Once issued, a COAC remains valid until information supplied in the COAC application or the COAC terms become inapplicable to the vessel.

The Fourteenth District Prevention Division, U.S. Coast Guard, certifies that the CGMA CGM DAKA (IMO 9436070) is a vessel of special construction or purpose, and that, with respect to the position of the forward cargo crane creating a blind sector 1,000 meters immediately ahead of the bow of the vessel over a range of approximately 1–2 degrees, it is not possible to comply fully with the requirements of the provisions enumerated in the 72 COLREGS, without interfering with the normal operation, construction, or design of the vessel. The U.S. Coast Guard Fourteenth District Prevention Division further finds and certifies that the construction and placement of the forward cargo crane creating a blind sector 1,000 meters immediately ahead of the bow of the vessel over a range of approximately 1–2 degrees, are in the closest possible compliance with the applicable provisions of the 72 COLREGS.⁶

This notice is issued under authority of 33 U.S.C. 1605(c) and 33 CFR 81.18.

Dated: April 25, 2022.

Ulysses S. Mullins,

Captain, U.S. Coast Guard, Chief, Prevention Division, Fourteenth Coast Guard District.

BILLING CODE 9110–04–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[Docket No. FWS–R1–ES–2020–0101; FXES11140100000–223–FF01E0000]

Final Environmental Impact Statement and Habitat Conservation Plan for Thurston County, Washington

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), announce the availability of a final environmental impact statement (FEIS), which analyzes a proposed habitat conservation plan (HCP) developed by Thurston County, Washington (applicant, or the County). This FEIS was prepared jointly by the Service and Thurston County to satisfy both the National Environmental Policy Act and the Washington State Environmental Policy Act. The HCP was submitted by the applicant in support of an application for an incidental take permit (ITP) under the Endangered Species Act. The applicant is seeking authorization for the incidental take of six species, which is expected to result from various County-permitted development activities, as well as construction and maintenance of County-owned or County-managed infrastructure, over the next 30 years.

DATES: The Service's ITP decision will occur no sooner than 30 days after publication of the U.S. Environmental Protection Agency's notice of availability of the FEIS in the **Federal Register**, and will be documented in a record of decision.

ADDRESSES: You may obtain copies of the documents by any of the following methods:

- **Internet:** <https://www.regulations.gov> (Docket No. FWS–R1–ES–2020–0101) or at <https://www.fws.gov/wafwo/>.

- **Phone:** You may call Kevin Connally, at 360–753–9440, to request alternative formats of the documents.

FOR FURTHER INFORMATION CONTACT:

Kevin Connally, U.S. Fish and Wildlife Service, Washington Fish and Wildlife Office (see **ADDRESSES**); telephone: 360–753–9440; email: Kevin_Connally@fws.gov. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: We, the U.S. Fish and Wildlife Service (Service), announce the availability of a final environmental impact statement (FEIS) addressing Thurston County's (applicant or County) proposed habitat conservation plan (HCP). In accordance with the requirements of the Endangered Species Act, as amended (ESA; 16 U.S.C. 1531 *et seq.*), the applicant is seeking an incidental take permit (ITP) authorizing take of the threatened Yelm pocket gopher (*Thomomys mazama yelmensis*), Olympia pocket gopher (*T. mazama pugetensis*), Tenino pocket gopher (*T. mazama tumuli*), and Oregon spotted frog (*Rana pretiosa*); the endangered Taylor's checkerspot butterfly (*Euphydryas editha taylori*); and the Oregon vesper sparrow (*Poocetes gramineus affinis*), which is under review to determine if Federal listing under the ESA is warranted (hereafter, "covered species").

If issued, the ITP would authorize take of the covered species that may occur incidental to various County-permitted development activities, as well as construction and maintenance of County-owned or County-managed infrastructure, for a period of 30 years. The applicant would avoid, minimize, and mitigate impacts to covered species, and would fully offset the impact of taking. In support of the ITP application, the applicant prepared the HCP, which describes the steps the applicant would take to avoid, minimize, and mitigate impacts to covered species associated with the above activities in accordance with HCP and ITP requirements. Mitigation would be achieved through the permanent conservation and maintenance of covered species habitat. The HCP also describes, without limitation, the life history and ecology of the covered species, the impact of the anticipated taking on covered species, adaptive management procedures, monitoring procedures, changed circumstances, and funding assurances for HCP implementation.

This Final EIS provides updates, as needed, to information presented in the draft EIS, including revisions in response to issues raised in comments received during the public review period for that document. No substantial changes to the proposed action or other alternatives were made that are relevant to environmental concerns, and no significant new circumstances or information relevant to the impacts of the alternatives analyzed in the draft EIS were found.

This FEIS was prepared consistent with the Department of the Interior
