Federal Motor Carrier Safety Administration

[Docket No. FMCSA-2016-0342]

Hours of Service of Drivers: American Concrete Pumping Association (ACPA); Application for Exemption

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of application for exemption; request for comments.

SUMMARY: FMCSA announces that it has received an application from the American Concrete Pumping Association (ACPA) for an exemption from the 30-minute rest break provision of the Agency's hours-of-service (HOS) regulations for commercial motor vehicle (CMV) drivers. ACPA requests that concrete pump operators be allowed to use 30 minutes or more of on-duty "waiting time" to satisfy the requirement for the 30-minute rest break, provided they do not perform any other work during the break. The requested exemption would apply industry-wide to all concrete pump operators, concrete pumping companies and drivers who operate concrete pumps. Due to the nature of pumper operations, ACPA believes that compliance with the 30-minute rest break rule increases the risk of dangerous conditions on job sites. ACPA also asserts that concrete pump operators already take regular rest breaks throughout the typical day, depending on the work flow at the job site, so an additional 30-minute rest break does not enhance overall job safety. FMCSA requests public comment on ACPA's application for exemption.

II. Legal Basis

FMCSA has authority under 49 U.S.C. 31136(e) and 31315 to grant exemptions from certain Federal Motor Carrier Safety Regulations (FMCSRs). FMCSA must publish a notice of each exemption request in the **Federal Register** (49 CFR 381.315(a)). The Agency must provide the public an opportunity to inspect the information relevant to the application, including any safety analyses that have been conducted. The Agency must also provide an opportunity for public comment on the request.

The Agency reviews safety analyses and public comments submitted, and determines whether granting the exemption would likely achieve a level of safety equivalent to, or greater than, the level that would be achieved by the current regulation (49 CFR 381.305). The decision of the Agency must be published in the **Federal Register** (49 CFR 381.315(b)) with the reasons for denying or granting the application and, if granted, the name of the person or class of persons receiving the exemption, and the regulatory provision from which the exemption is granted. The notice must also specify the effective period and explain the terms and conditions of the exemption. The exemption may be renewed (49 CFR 381.300(b)).
