*Current Actions:* The Museum Grants for African American History and Culture (AAHC) program is one of these six OIMLS Office of Museum Services (OMS) grant programs, and it was created by an Act of Congress in 2003—the same act that created the Smithsonian National Museum of African American History and Culture. This legislation directed IMLS to create a grant program to improve operations, care of collections, and development of professional management at African American museums. Now in its 13th year of funding grants, AAHC funds projects that nurture museum professionals; builds institutional capacity; and increases access to museum and archival collections at African American museums and Historically Black Colleges and

Universities (HBCUs). Museums of all sizes and geographic areas whose primary purpose, as reflected in their mission is African American art, life, history, and culture, are eligible to apply for an AAHC grant.

The agency now seeks to undertake a systematic assessment to evaluate the performance of the AAHC grant program. The proposed evaluation approach is intended to provide a reasonable balance between scientific considerations for valid and reliable evidence with stakeholder utilization of the acquired knowledge. This investigation is tended to inform IMLS decision-making for current and future grant-making in this grant program, as well as for practices in this segment of the museum sector.

This action is to create the survey forms and instructions for the assessment for the next three years. The 60-day notice for the Assessment of the IMLS African American History and Culture (AAHC) Grant Program, was published in the **Federal Register** on August 27, 2019 (84 FR 44942–43). ### SUPPLEMENTARY INFORMATION:

#### I. Introduction

The NRC is granting an exemption from paragraph B of section III, “Scope and Contents,” of appendix D, “Design Certification Rule for the AP1000,” to part 52 of title 10 of the *Code of Federal Regulations* (10 CFR), and issuing License Amendment Nos. 173 and 171 to COLs, NPF–91 and NPF–92, respectively, to SNC. The exemption is required by paragraph A.4 of section VIII, “Processes for Changes and Departures,” appendix D, to 10 CFR part 52 to allow SNC to depart from Tier 1 information. With the requested amendment, SNC proposed changes to COL Appendix C (and plant-specific DCD Tier 1) to revise Inspections, Tests, Analyses, and Acceptance Criteria (ITAAC) to incorporate design basis passive residual heat removal heat exchanger leakage to the in-containment refueling water storage tank as a radiation source.

Part of the justification for granting the exemption was provided by the review of the amendment. Because the exemption is necessary in order to issue the requested license amendment, the NRC granted the exemption and issued the amendment concurrently, rather than in sequence. This included issuing a combined safety evaluation containing the NRC staff's review of both the exemption request and the license amendment. The exemption met all applicable regulatory criteria set forth in sections 50.12, 52.7, and section VIII.A.4 of appendix D to 10 CFR part 52. The license amendment was found to be acceptable as well. The combined safety evaluation is available in ADAMS under Accession No. ML19361A118.

Identical exemption documents (except for referenced unit numbers and license numbers) were issued to SNC for VEGP Units 3 and 4 (COLs, NPF–91 and NPF–92). The exemption documents for VEGP Units 3 and 4 can be found in ADAMS under Accession Nos. ML19361A119 and ML19361A109, respectively. The exemption is reproduced (with the exception of abbreviated titles and additional citations) in Section II of this document.
