National Agricultural Statistics Service

Title: Agricultural Prices.

OMB Control Number: 0535–0003.

Summary of Collection: The

Agricultural Prices surveys provide data on the prices received by farmers and prices paid for production goods and services. This information is needed by the U.S. Department of Agriculture, National Agriculture Statistics Service (NASS) for the following purposes: (a) To compute Parity Prices in accordance with requirements of the Agricultural Adjustment Act of 1938 as amended (Title III, Subtitle A, Section 301a), (b) to estimate value of production, inventory values, and cash receipts from farming, (c) to determine the level for farmer owned reserves, (d) to provide guidelines for Risk Management Agency price selection options, (e) to determine Federal disaster prices to be paid, (f) establishing USDA's net farm income projections by the Economic Research Service and (g) to determine the grazing fee on Federal lands. General authority for these data collection activities is granted under U.S. Code Title 7, Section 2204.

Revisions were made to reflect the following program changes made to the Prices Received surveys. The Prices Received survey for sugar and the annual Livestock and Crops Survey in Alaska, were both discontinued. Some of the States that were conducting monthly milk price surveys dropped back to collecting the data quarterly. There are no program changes made to the Prices Paid surveys. The remainder of the changes are adjustments to the sample sizes and burden minutes.

Need and Use of the Information: The NASS price program computes annual U.S. weighted average prices received by farmers for wheat, barley, oats, corn, grain sorghum, rice, cotton, peanuts, pulse crops and oilseeds based on monthly marketing. Estimates of prices received are used by NASS to determine the value of agricultural production. Prices estimates are used by many Government agencies as a general measure of commodity price changes, economic analysis relating to farm income and alternative marketing policies, and for disaster and insurance payments. NASS estimates based on

these surveys are used as a Principle Economic Indicator of the United States. These price estimates are also used to compute Parity Prices in accordance with requirements of the Agricultural Adjustment Act of 1938 as amended (Title III, Subtitle A, Section 301(a)).

Description of Respondents: Farms; Business or other for-profit.

Number of Respondents: 67,025.

Frequency of Responses: Reporting: On occasion; Monthly; Annually; Biennially.

Total Burden Hours: 32,416.

Clearance Officer.*
