Negative Determinations for Worker Adjustment Assistance and Alternative Trade Adjustment Assistance

In the following cases, the investigation revealed that the eligibility criteria for worker adjustment assistance have not been met for the reasons specified.

Because the workers of the firm are not eligible to apply for TAA, the workers cannot be certified eligible for ATAA.

The investigation revealed that criteria (a)(2)(A)(I.C.) (increased

imports) and (a)(2)(B)(II.B.) (shift in production to a foreign country) have not been met.

Determinations Terminating Investigations of Petitions for Worker Adjustment Assistance

After notice of the petitions was published in the **Federal Register** and on the Department's Web site, as required by Section 221 of the Act (19 U.S.C. 2271), the Department initiated investigations of these petitions.

The following determinations terminating investigations were issued because the petitioning groups of workers are covered by active certifications. Consequently, further investigation in these cases would serve no purpose since the petitioning group of workers cannot be covered by more than one certification at a time.

I hereby certify that the aforementioned determinations were issued during the period of July 28, 2014 through August 1, 2014. These determinations are available on the Department's Web site www.doleta.gov/tradeact/taa/taa_search_form.cfm under the searchable listing of determinations or by calling the Office of Trade Adjustment Assistance toll free at 888-365-6822.

Signed at Washington, D.C. this 6th day of August 2014.

Certifying Officer, Office of Trade Adjustment Assistance.

NATIONAL SCIENCE FOUNDATION

Notice of Permit Modification Received Under the Antarctic Conservation Act of 1978 (Pub. L. 95-541)

AGENCY: National Science Foundation.

ACTION: Notice of Permit Modification Request Received under the Antarctic Conservation Act of 1978, Pub. Law 95-541.

SUMMARY: The National Science Foundation (NSF) is required to publish a notice of requests to modify permits issued to conduct activities regulated under the Antarctic Conservation Act of 1978. NSF has published regulations

under the Antarctic Conservation Act at Title 45 part 670 of the Code of Federal Regulations. This is the required notice of a requested permit modification.

DATES: Interested parties are invited to submit written data, comments, or views with respect to this permit application by September 17, 2014. Permit applications may be inspected by interested parties at the Permit Office, address below.

ADDRESSES: Comments should be addressed to Permit Office, Room 755, Division of Polar Programs, National Science Foundation, 4201 Wilson Boulevard, Arlington, Virginia 22230.

FOR FURTHER INFORMATION CONTACT: Li Ling Hamady, ACA Permit Officer, at the above address or ACApermits@nsf.gov or (703) 292-7149.

SUPPLEMENTARY INFORMATION: The National Science Foundation, as directed by the Antarctic Conservation Act of 1978 (Pub. L. 95-541), as amended by the Antarctic Science, Tourism and Conservation Act of 1996, has developed regulations for the establishment of a permit system for various activities in Antarctica and designation of certain animals and certain geographic areas requiring special protection. The regulations establish such a permit system to designate Antarctic Specially Protected Areas.

Description of Permit Modification Requested: The Foundation issued a waste permit (ACA 2014-007) to Daniel McGrath from Earth Vision Trust/Lindblad Expeditions on October 23, 2013. The issued permit allows the applicant, Earth Vision Trust, to install a maximum of 10 cameras distributed between 5 sites that are often visited by tourists. No more than 2 cameras are installed at any one site. Cameras are placed in such a way so as to not disrupt wildlife. Cameras are secured using 6-8 rock bolts drilled into rock outcrops. Each camera is powered by a 10w solar panel and a sealed 12 volt 55 AH gel battery. The batteries are housed in a leak proof plastic case. The cameras will remain deployed for 5 years total and will be completely removed (including bolts and power sources) at the conclusion of the project. Each camera is visited every 1-2 years to retrieve data, make necessary repairs, and remove non-functioning equipment. The cameras are used to measure ice velocity and monitor the calving front of numerous outlet glaciers. The data will help advance scientific knowledge on the mechanics and pace of glacial retreat. Images gained from the cameras will also be used in global outreach campaigns to educate the public about

the speed of climate change's impact on the earth.

Now the applicant proposes a modification to his permit to deploy two more cameras at one site on Amsler Island, proximal to Palmer Station, accessed by zodiacs launched from Lindblad Expeditions' *National Geographic Explorer* ship.

Location: Amsler Island, Antarctic Peninsula.

DATES:

November 1, 2014 to March 21, 2017.

Polar Coordination Specialist, Division of Polar Programs.
