

The agenda for the meeting is as follows:

- Welcome remarks from Co-Chair
- Discussion of status of NASA's implementation of selected Columbia Accident Investigation Board Return to Flight recommendations
- Action item summary from Executive Secretary
- Closing remarks from Co-Chair

It is imperative that the meeting be held on this date to accommodate the scheduling priorities of the key participants. Live audio of the public meeting will be available via the Internet at <http://returntoflight.org>.

P. Diane Rausch,

*Advisory Committee Management Officer,
National Aeronautics and Space
Administration.*

BILLING CODE 7510-13-P

NUCLEAR REGULATORY COMMISSION

[Docket NO. 50-170]

Notice of License Renewal Application for Facility Operating License; Armed Forces Radiobiology Research Institute

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has received an application dated June 24, 2004, from the Armed Forces Radiobiology Research Institute (AFRRI), filed pursuant to Section 104c of the Atomic Energy Act of 1954, as amended (the Act), and 10 CFR 50.51(a), to renew Operating License No. R-84 for the Armed Forces Radiobiology Research Institute TRIGA Mark-F reactor. AFRRI requested renewal of the license to authorize operation of the facility for an additional 20-year period beyond the period specified in the current operating license. The current operating license for the AFRRI reactor (R-84) expired on August 1, 2004. In accordance with 10 CFR 2.109(a), the application for renewal was submitted at least 30 days prior to the expiration of the existing license, and therefore the existing license will not be deemed to have expired until the application has been finally determined. The reactor is located on the grounds of the National Naval Medical Center (NNMC), Bethesda, Maryland. The mission of AFRRI is to conduct scientific research in the field of radiobiology and related matters essential to the support of the Department of Defense. The acceptability of the tendered application

for renewal and other matters including an opportunity to request a hearing, will be the subject of a subsequent **Federal Register** notice.

Copies of the application are available electronically at NRC's Electronic Reading Room at <http://www.nrc.gov/reading-rm/adams.html> under accession number ML041800067. From this site, you can access the NRC's Agencywide Documents Access and Management System (ADAMS), which provides text and image files of NRC's public documents. Please note that on October 25, 2004, the NRC terminated public access to ADAMS and initiated an additional security review of publicly available documents to ensure that potentially sensitive information is removed from the ADAMS database accessible through the NRC's Web site. Interested members of the public may obtain copies of the referenced documents for review and/or copying by contacting the Public Document Room pending resumption of public access to ADAMS. The NRC Public Document Room is located at NRC Headquarters in Rockville, MD, and can be contacted at (800) 397-4209, (301) 415-4737 or by e-mail to: pdr@nrc.gov.

Dated at Rockville, Maryland, this 18th day of November 2004.

For the Nuclear Regulatory Commission.

Patrick M. Madden,

Section Chief, Research and Test Reactors Section, New, Research and Test Reactors Program, Division of Regulatory Improvement Programs, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-317 and 50-318]

Calvert Cliffs Nuclear Power Plant, Unit Nos. 1 and 2; Notice of Consideration of Issuance of Amendment to Renewed Facility Operating License and Opportunity for a Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Renewed Facility Operating License No. DPR-53 and No. DPR-69, issued to Calvert Cliffs Nuclear Power Plant, Inc. (the licensee), for operation of the Calvert Cliffs Nuclear Power Plant, Unit Nos. 1 and 2 located in Lusby, MD.

The proposed amendment would revise Technical Specification 3.9.4, "Shutdown Cooling (SDC) and Coolant Circulation-High Water Level," to incorporate the use of an alternate cooling method to function as a path for

decay heat removal when in Mode 6 with the refueling pool fully flooded. The spent fuel pool cooling system is the alternative cooling method intended to be used as a substitute for the SDC system during the refueling operations, including during fuel movement.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations.

Within 60 days after the date of publication of this notice, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing and a petition for leave to intervene. Requests for a hearing and a petition for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR part 2. Interested persons should consult a current copy of 10 CFR 2.309, which is available at the Commission's PDR, located at One White Flint North, Public File Area 01F21, 11555 Rockville Pike (first floor), Rockville, Maryland. Publicly available records will be accessible from the Agencywide Documents Access and Management System's (ADAMS) Public Electronic Reading Room on the Internet at the NRC Web site, <http://www.nrc.gov/reading-rm/doc-collections/cfr/>. (**NOTE:** Public access to ADAMS has been temporarily suspended so that security reviews of publicly available documents may be performed and potentially sensitive information removed. Please check the NRC Web site for updates on the resumption of ADAMS access.) If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or a presiding officer designated by the Commission or by the Chief Administrative Judge of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition; and the Secretary or the Chief Administrative Judge of the Atomic Safety and Licensing Board will issue a notice of a hearing or an appropriate order.

As required by 10 CFR 2.309, a petition for leave to intervene shall set forth with particularity the interest of the petitioner/requestor in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with

particular reference to the following general requirements: (1) The name, address and telephone number of the requestor or petitioner; (2) the nature of the requestor's/petitioner's right under the Act to be made a party to the proceeding; (3) the nature and extent of the requestor's/petitioner's property, financial, or other interest in the proceeding; and (4) the possible effect of any decision or order which may be entered in the proceeding on the requestor's/petitioner's interest. The petition must also identify the specific contentions which the petitioner/requestor seeks to have litigated at the proceeding.

Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner/requestor shall provide a brief explanation of the bases for the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. The petition must include sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendment under consideration. The contention must be one which, if proven, would entitle the petitioner/requestor to relief. A petitioner/requestor who fails to satisfy these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing.

Nontimely requests and/or petitions and contentions will not be entertained absent a determination by the Commission or the presiding officer of the Atomic Safety and Licensing Board that the petition, request and/or the contentions should be granted based on a balancing of the factors specified in 10 CFR 2.309(a)(1)(i)-(viii).

A request for a hearing or a petition for leave to intervene must be filed by: (1) First-class mail addressed to the Office of the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, Attention: Rulemaking and Adjudications Staff; (2) courier, express

mail, and expedited delivery services: Office of the Secretary, Sixteenth Floor, One White Flint North, 11555 Rockville Pike, Rockville, Maryland, 20852, Attention: Rulemaking and Adjudications Staff; (3) e-mail addressed to the Office of the Secretary, U.S. Nuclear Regulatory Commission, HEARINGDOCKET@NRC.GOV; or (4) facsimile transmission addressed to the Office of the Secretary, U.S. Nuclear Regulatory Commission, Washington, DC, Attention: Rulemakings and Adjudications Staff at (301) 415-1101, verification number is (301) 415-1966. A copy of the request for hearing and petition for leave to intervene should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, and it is requested that copies be transmitted either by means of facsimile transmission to 301-415-3725 or by email to OGCMailCenter@nrc.gov. A copy of the request for hearing and petition for leave to intervene should also be sent to James M. Petro, Jr., Esquire, Counsel, Constellation Energy Group, Inc., 750 East Pratt Street, 5th floor, Baltimore, MD 21202, attorney for the licensee.

For further details with respect to this action, see the application for amendment dated June 7, 2004, which is available for public inspection at the Commission's PDR, located at One White Flint North, Public File Area O1 F21, 11555 Rockville Pike (first floor), Rockville, Maryland. Publicly available records will be accessible electronically from the Agencywide Documents Access and Management System's (ADAMS) Public Electronic Reading Room on the Internet at the NRC Web site, <http://www.nrc.gov/reading-rm/adams.html>. Persons who do not have access to ADAMS or who encounter problems in accessing the documents located in ADAMS, should contact the NRC PDR Reference staff by telephone at 1-800-397-4209, (301) 415-4737, or by e-mail to pdr@nrc.gov. (**Note:** Public access to ADAMS has been temporarily suspended so that security reviews of publicly available documents may be performed and potentially sensitive information removed. Please check the NRC Web site for updates on the resumption of ADAMS access.)

Dated in Rockville, Maryland, this 22nd day of November, 2004.

For the Nuclear Regulatory Commission.

Richard V. Guzman,

Project Manager, Section 1, Project Directorate I, Division of Licensing Project Management, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-123]

Notice of License Renewal Application for Facility Operating License, University of Missouri—Rolla

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has received an application dated August 30, 2004, from the University of Missouri—Rolla (UMR), filed pursuant to Section 104c of the Atomic Energy Act of 1954, as amended (the Act), and 10 CFR 50.51(a), to renew Operating License No. R-79 for the University of Missouri—Rolla Reactor (UMRR). UMR requested renewal of the license to authorize operation of the facility for an additional 20-year period beyond the period specified in the current operating license. The current operating license for the UMRR (R-79) expires on January 14, 2005. In accordance with 10 CFR 2.109(a), the application for renewal was submitted at least 30 days prior to the expiration of the existing license, and therefore the existing license will not be deemed to have expired until the application has been finally determined. The reactor is located on the campus of the University of Missouri in the city of Rolla, Missouri. The UMRR is used for training of nuclear engineering students and other engineering and science students. It is also used for research by the UMR faculty, UMR graduate students, UMRR staff, and students and instructors from other colleges and universities in the Midwest. The acceptability of the tendered application for renewal and other matters including an opportunity to request a hearing, will be the subject of a subsequent **Federal Register** notice.

Copies of the application are available electronically at NRC's Electronic Reading Room at <http://www.nrc.gov/reading-rm/adams.html> under accession number ML042820116. From this site, you can access the NRC's Agencywide Documents Access and Management System (ADAMS), which provides text and image files of NRC's public documents. Please note that on October 25, 2004, the NRC terminated public access to ADAMS and initiated an
