6. Railroads should work together to develop best practices for utilizing weather forecasting technologies, predictive weather models, and weather-related action plans throughout the industry. In doing so, railroads should consider how much deviation exists between railroads related to operational weather rules, policies, and procedures. Railroads should consider whether those deviations are justified and to what extent rail safety would benefit from industry-wide standardization of weather-related rules, policies, procedures, and weather-related action plans in general. Railroads should also consider whether individual railroad weather-related rules, policies, and action plans include adequate collaboration with tenant and interchange railroads.

Conclusion

FRA encourages all railroad industry members to take actions consistent with the recommendations of this Safety Advisory to prevent weather-related accidents/incidents. FRA may modify this Safety Advisory, issue additional

safety advisories, or take other appropriate action necessary to ensure the highest level of safety on the Nation's railroads, including pursuing other corrective measures under its rail safety authority.

Issued in Washington, DC.

*Associate Administrator for Railroad Safety
Chief Safety Officer.*
