Approval and Promulgation of Implementation Plans; Ohio

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to approve Ohio's March 1, 2005, submittal of a revision to the Clinton County 1-Hour ozone maintenance plan under the Clean Air Act. This maintenance plan revision establishes a new transportation conformity motor vehicle emissions budget (MVEB) for the area for the year 2006. EPA is proposing to approve the allocation of a portion of the safety margin for oxides of nitrogen (NO_x) to the area's 2006 MVEB for transportation conformity purposes. This allocation will still maintain the total emissions for the area at or below the attainment level required by the transportation conformity regulations. The transportation conformity budget for volatile organic compounds will remain the same as previously approved in the maintenance plan. In this action, EPA is also correcting the codification for a previous approval action for Cincinnati, Ohio.

In the final rules section of this **Federal Register**, EPA is approving the SIP revision as a direct final rule without prior proposal, because EPA views this as a noncontroversial revision and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. If we do not receive any adverse comments in response to these direct final and proposed rules, we do not contemplate taking any further action in relation to this proposed rule. If EPA receives adverse comments, we will withdraw the direct final rule and will respond to all public comments in a subsequent final rule based on this proposed rule. EPA will not institute a second comment period on this action. Any parties interested in commenting on this action should do so at this time.
