SUPPLEMENTARY INFORMATION: This listening session is a new step in EPA's revised process, announced on April 10, 2008, for development of human health assessments for inclusion on IRIS. The new process is posted on the NCEA home page under the Recent Additions menu at <http://www.epa.gov/ncea>. Two listening sessions are scheduled under the new IRIS process. The first is during the public review of the draft assessment that includes only qualitative discussion. The second session is during the public review of the externally peer reviewed draft assessment; if feasible, this draft will include both qualitative and quantitation elements (i.e., a "complete draft"). All IRIS assessments that are at the document development stage will follow the revised process, which includes the two listening sessions. However, when EPA initiated the new IRIS process, the draft assessment for Ethylene Glycol Mono Butyl Ether (EGBE) had already completed document development and been through several rounds of internal review. Therefore, EPA will only hold one listening session during the public review and comment period of the externally peer-reviewed draft.
