National Agricultural Statistics Service

Title: Feral Swine Survey.

OMB Control Number: 0535-NEW.

Summary of Collection: On February 3, 1999, Executive Order 13112 was signed by President Clinton establishing the National Invasive Species Council. The Executive Order requires that a Council of Departments dealing with invasive species be created. Currently there are 13 Departments and Agencies on the Council. A benchmark survey will be conducted in 2015 in the 11 States (Alabama, Arkansas, California, Florida, Georgia, Louisiana, North Carolina, Mississippi, Missouri, South Carolina, and Texas) that have high feral swine densities and a significant presence of corn, soybeans, wheat, rice, grain sorghum (Texas) and peanuts. Authority to collect these data is authorized under 7 U.S.C. 2204(a). Individually identifiable data collected under this authority are governed by Section 1770 of the Food Security Act of 1985, 7 U.S.C. 2276.

Need And Use of the Information: The purpose of the proposed survey is to develop a national estimate of the benefits and costs of feral swine damage and risks to agriculture, animal health, human health, and property. The initial survey will be used to create a benchmark for the monetary loss for all crops, livestock, and property caused by feral swine for producers of corn, soybeans, wheat, rice, grain sorghum (TX only) and peanuts in each of the survey states. Information on feral swine control costs including hunting, trapping, use of fencing, or the use of repellents and the total net income for allowing the hunting of feral swine on their operations will also be collected. Without this survey, it would be impossible to measure the current level of feral swine damage to American agriculture.

Description of Respondents: Farms.

Number of Respondents: 10,800.

Frequency of Responses: Reporting: Other (8 off qtr. months).

Total Burden Hours: 5,500.

Charlene Parker,

Departmental Information Collection Clearance Officer.
