Proposed Project

Customer Surveys Generic Clearance for the National Center for Health Statistics (NCHS) (OMB Control No. 0920–0729, Exp. 08/31/2023) — Extension—National Center for Health Statistics (NCHS), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

Section 306 of the Public Health Service (PHS) Act (42 U.S.C. 242k), as amended, authorizes that the Secretary of Health and Human Services (HHS), acting through the National Center for Health Statistics (NCHS), shall collect statistics on the extent and nature of

illness and disability of the population of the United States. This is an Extension request for a generic approval from OMB to conduct customer surveys over the next three years.

As part of a comprehensive program, NCHS plans to continue to assess its customers’ satisfaction with the content, quality and relevance of the information it produces. NCHS will conduct voluntary customer surveys to assess strengths in agency products and services and to evaluate how well it addresses the emerging needs of its data users. Results of these surveys will be used in future planning initiatives.

The data will be collected using a combination of methodologies appropriate to each survey. These may include evaluation forms, mail surveys, focus groups, automated and electronic technology (e.g., email, web-based surveys), and telephone surveys. Systematic surveys of several groups will be folded into the program. Among these are federal customers and policy makers, state and local officials who rely on NCHS data, the broader educational, research, and public health

community, and other data users. Respondents may include data users who register for and/or attend NCHS sponsored conferences, persons who access the NCHS website and the detailed data available through it, consultants, and others. Respondent data items may include (in broad categories) information regarding respondent’s gender, age, occupation, affiliation, location, etc., to be used to characterize responses only. Other questions will attempt to obtain information that will characterize the respondents’ familiarity with and use of NCHS data, their assessment of data content and usefulness, general satisfaction with available services and products, and suggestions for improvement of surveys, services and products.

In order to capture feedback opportunities, this extension request allows for both respondents and time per response for a total estimated annual burden total of 2,250 hours. There is no cost to respondents other than their time to participate in the surveys.

ESTIMATED ANNUALIZED BURDEN HOURS
