SUPPLEMENTARY INFORMATION:

Authority

Issuance of permits and permit modifications, as required by the Endangered Species Act of 1973 (16 U.S.C. 1531-1543) (ESA), is based on a finding that such permits/modifications:

(1) are applied for in good faith; (2) would not operate to the disadvantage of the listed species which are the subject of the permits; and (3) are consistent with the purposes and policies set forth in section 2 of the ESA. Scientific research and/or enhancement permits are issued under section 10 (a)(1)(A) of the ESA. Authority to take listed species is subject to conditions set forth in the permits. Permits and modifications are issued in accordance with and are subject to the ESA and NMFS regulations governing listed fish and wildlife permits (50 CFR parts 222-226).

Those individuals requesting a hearing on an application listed in this notice should set out the specific reasons why a hearing on that application would be appropriate (see **ADDRESSES**). The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries, NOAA. All statements and opinions contained in the permit action summaries are those of the applicant and do not necessarily reflect the views of NMFS.

Species Covered in This Notice

The following species are covered in this notice:

Endangered Shortnose Sturgeon (*Acipenser brevirostrum*)

Application 1353

The shortnose sturgeon, *Acipenser brevirostrum*, is the only federally listed endangered marine fish in North Carolina. In the late 1800's, NC shortnose and Atlantic sturgeon supported the largest sturgeon fishery in the southeastern U.S. Due to habitat loss and overfishing, NC sturgeon populations declined until both species were considered in danger of extinction in the state. This research will sample and track the shortnose sturgeon of the rivers of NC, including the Cape Fear river system, the Brunswick River, and the Northeast Cape Fear River. The fish will be collected by gillnetting, trawling, and electroshocking. They will then be documented for measurements, disease and catch per unit effort. The fish will then be tagged with an internal ultrasonic transmitter and released. The tagged fish will be monitored for the life of the battery of the implants, approximately 7 months.

Dated: November 26, 2001.

Chief, Permits, Conservation and Education Division, Office of Protected Resources, National Marine Fisheries Service.

Importing of Marine Mammals (50 CFR part 216).

The applicant proposes to test the hypothesis that relatively few local California sea lions break through bait receiver walls and damage bait fish at various California harbors. To test this, the applicant proposes to radio tag and track sea lions that exhibit territorial behavior near bait receivers and document interaction patterns at bait receivers. The results of this study will help institute measures to eliminate intentional or accidental feeding of sea lions at selected bait receivers.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Written comments or requests for a public hearing on this application should be mailed to the Chief, Permits and Documentation Division, F/PR1, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular request would be appropriate.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of this application to the Marine Mammal Commission and its Committee of Scientific Advisors.
