

Plan shall provide adequate controls to keep potential doses to workers and the public from direct exposure, airborne material, and released effluents as low as is reasonably achievable.

NRC also believes that remediation of the facility according to the SDMP Action Plan criteria (NRC, 1992) adequately protects workers, members of the public, and the environment. The potential environmental impacts from the proposed action are not significant.

Finding of No Significant Impact

NRC has prepared an EA related to the approval of UCAR's Remediation (Decommissioning) Plan, Terminated License No. SNM-724 and SMB-720. On the basis of this EA, NRC has concluded that the environmental impacts that would be created by the proposed action would not be significant and do not warrant the preparation of an Environmental Impact Statement. Accordingly, it has been determined that a Finding of No Significant Impact is appropriate.

The EA and the documents related to this proposed action are available for public inspection and copying at NRC's Electronic Reading Room at <http://www.nrc.gov/NRC/ADAMS/index.html>.

NUCLEAR REGULATORY COMMISSION

Experts' Meeting on Burnup Credit in Spent Fuel Shipping Casks

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of meeting.

SUMMARY: The Nuclear Regulatory Commission will hold a meeting to develop a Phenomena Identification and Ranking Table (PIRT) for allowing burnup credit in spent fuel shipping casks. PIRTs have been used at NRC since 1988, and they provide a structured way to obtain a technical understanding that is needed to address certain issues. About fifteen of the world's best technical experts are participating in this activity, and the experts represent a balance between industry, universities, foreign researchers, and regulatory organizations. The PIRT activity is addressing technical issues related to burnup credit in the criticality safety analyses of PWR spent fuel in transport casks.

DATES: August 22-24, 2000, 8:30 am-5:30 pm.

ADDRESSES: Advisory Committee on Reactor Safeguards (ACRS) Room (T2B3) of the Nuclear Regulatory Commission, 11545 Rockville Pike, Rockville, MD.

FOR FURTHER INFORMATION CONTACT: Dr. David Ebert, SMSAB, Division of Systems Analysis and Regulatory Effectiveness, Office of Nuclear Regulatory Research, Washington, D.C. 20555-0001, telephone (301) 415-6501.

SUPPLEMENTARY INFORMATION: The meeting agenda will be posted on the NRC Web site at www.nrc.gov/RES/meetings.html by August 14, 2000. The meeting is open to the public. Attendees will need to obtain a visitor badge at the TWFN building lobby, but an escort is not required.
