NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-313, 368, 416, 003, 247, 286, 333, 293, 458, 271, and 382]

Entergy Operations, Inc., Entergy Nuclear Operations, Inc., Arkansas Nuclear One, Units 1 and 2; Grand Gulf Nuclear Station; Indian Point Nuclear Station, Units 1, 2 and 3; James A. Fitzpatrick Nuclear Power Plant; Pilgrim Nuclear Power Station; River Bend Station; Vermont Yankee Nuclear Power Plant; and Waterford Steam Electric Station, Unit 3; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (NRC) is considering issuance of exemptions from Title 10 of the Code of Federal Regulations (10 CFR) part 20, section 20.1003 for Renewed Facility Operating License No. DPR-51; Facility Operating License Nos. NPF-6 and NPF-29; Provisional Operating License No. DPR-5; and Facility Operating License Nos. DPR-26, DPR-64, DPR-59, DPR-35, NPF-47, DPR-28, and NPF-38; issued to Entergy Operations, Inc. and Entergy Nuclear Operations, Inc. (the licensees), for operation of Arkansas Nuclear One, Units 1 and 2; Grand Gulf Nuclear Station; Indian Point Nuclear Station, Units 1, 2 and 3; James A. Fitzpatrick Nuclear Power Plant; Pilgrim Nuclear Power Station; River Bend Station; Vermont Yankee Nuclear Power Plant; and Waterford Steam Electric Station, Unit 3, located in Pope County, Arkansas; Claiborne County, Mississippi; Westchester County, New York; Oswego County, New York; Plymouth County, Massachusetts; West Feliciana Parish, Louisiana; Windham County, Vermont; and Saint Charles Parish, Louisiana. (The operating authority of Provisional Operating License No. DPR-5 for Indian Point Nuclear Station, Unit 1, was revoked by Commission Order dated June 19, 1980). Therefore, as required by 10 CFR 51.21, the NRC is issuing this environmental assessment and finding of no significant impact.

Environmental Assessment

Identification of the Proposed Action

The proposed action would provide an exemption from the 10 CFR 20.1003 definition of total effective dose equivalent (TEDE), which is the sum of the deep-dose equivalent (for external exposures) and the committed effective dose equivalent (for internal exposures). The proposed exemption would change the definition of TEDE to mean the sum of the effective dose equivalent or the deep-dose equivalent (for external exposures) and the committed effective dose equivalent (for internal exposures).

The proposed action is in accordance with the licensee's application dated July 20, 2001, as supplemented by letter dated June 13, 2002.

The Need for the Proposed Action

The proposed action is needed because the current method of calculating TEDE, under certain conditions, can significantly overestimate the dose received.

Environmental Impacts of the Proposed Action

The NRC has completed its evaluation of the proposed action and concludes that revising the methodology for calculating the dose received by individuals will not have any environmental impacts.

The proposed action will not significantly increase the probability or consequences of accidents, no changes are being made in the types of effluents that may be released off site, and there is no significant increase in occupational or public radiation exposure. Therefore, there are no significant radiological environmental impacts associated with the proposed action.

With regard to potential nonradiological impacts, the proposed action does not have a potential to affect any historic sites. It does not affect nonradiological plant effluents and has no other environmental impact. Therefore, there are no significant nonradiological environmental impacts associated with the proposed action.

Accordingly, the NRC concludes that there are no significant environmental impacts associated with the proposed action.

Environmental Impacts of the Alternatives to the Proposed Action

As an alternative to the proposed action, the staff considered denial of the proposed action (*i.e.*, the "no-action" alternative). Denial of the application would result in no change in current environmental impacts. The

environmental impacts of the proposed action and the alternative action are similar.

Alternative Use of Resources

This action does not involve the use of any different resources than those previously considered in: the Final Environmental Statement (FES) related to the operation of Arkansas Nuclear One, Unit 1, dated February 1973, and the Final Supplemental Environmental Impact Statement regarding Arkansas Nuclear One, Unit 1 (NUREG-1437, Supplement 3), dated April 2001; the FES related to the operation of Arkansas Nuclear One, Unit 2, dated June 1977; the FES related to the operation of Grand Gulf Nuclear Station, dated September 1981; previous reviews of Indian Point Nuclear Station, Unit 1, or the Final Generic Environmental Impact Statement on decommissioning of nuclear facilities, dated August 1988; the FES related to the operation of Indian Point Nuclear Station, Unit 2, dated September 1972; the FES related to the operation of Indian Point Nuclear Station, Unit 3, dated February 1975; the FES related to the operation of the James A. FitzPatrick Nuclear Power Plant, dated March 1973; the FES related to the operation of the Pilgrim Nuclear Power Station, dated May 1972; the FES related to the operation of the River Bend Station, dated January 1985; the FES related to the operation of the Vermont Yankee Nuclear Power Plant, dated July 1972; and the FES related to the operation of the Waterford Steam Electric Station, Unit 3, dated January 1985.

On August 14, 2002, the staff consulted with the Arkansas State official, Bernie Beville of the Arkansas Department of Health, regarding the environmental impact of the proposed action. On August 16, 2002, the staff consulted with the Mississippi State official, Silas Anderson, of the Mississippi Department of Health, regarding the environmental impact of the proposed action.
