

UL 61010B-2-031	Electrical Equipment for Measurement, Control, and Laboratory Use; Part 2: Particular Requirements for Hand-Held Probe Assemblies for Electrical Measurement and Test.
-----------------------	--

The designations and titles of the above test standards were current at the time of the preparation of the preliminary notice.

OSHA's recognition of CSA, or any NRTL, for a particular test standard is limited to equipment or materials (i.e., products) for which OSHA standards require third-party testing and certification before use in the workplace. Consequently, if a test standard also covers any product(s) for which OSHA does not require such testing and certification, an NRTL's scope of recognition does not include that product(s).

Many UL test standards are approved as American National Standards by the American National Standards Institute (ANSI). However, for convenience, we use the designation of the standards developing organization for the standard as opposed to the ANSI designation. Under our procedures, any NRTL recognized for an ANSI-approved test standard may use either the latest proprietary version of the test standard or the latest ANSI version of that standard. You may contact ANSI to find out whether or not a test standard is currently ANSI-approved.

Conditions

CSA must also abide by the following conditions of the recognition, in addition to those already required by 29 CFR 1910.7:

OSHA must be allowed access to CSA's facilities and records for purposes of ascertaining continuing compliance with the terms of its recognition and to investigate as OSHA deems necessary;

If CSA has reason to doubt the efficacy of any test standard it is using under this program, it must promptly inform the test standard developing organization of this fact and provide that organization with appropriate relevant information upon which its concerns are based;

CSA must not engage in or permit others to engage in any misrepresentation of the scope or conditions of its recognition. As part of this condition, CSA agrees that it will allow no representation that it is either a recognized or an accredited Nationally Recognized Testing Laboratory (NRTL) without clearly indicating the specific equipment or material to which this recognition is tied, or that its recognition is limited to certain products;

CSA must inform OSHA as soon as possible, in writing, of any change of

ownership, facilities, or key personnel, and of any major changes in its operations as an NRTL, including details;

CSA will meet all the terms of its recognition and will always comply with all OSHA policies pertaining to this recognition; and

CSA will continue to meet the requirements for recognition in all areas where it has been recognized.

Signed at Washington, DC, this 26th day of February, 2007.

Edwin G. Foulke, Jr.,

Assistant Secretary of Labor.

BILLING CODE 4510-26-P

NATIONAL SCIENCE FOUNDATION

Notice of Permit Applications Received Under the Antarctic Conservation Act of 1978 (Pub. L. 95-541)

AGENCY: National Science Foundation.

ACTION: Notice of Permit Applications Received under the Antarctic Conservation Act of 1978, Public Law 95-541.

SUMMARY: The National Science Foundation (NSF) is required to publish notice of permit applications received to conduct activities regulated under the Antarctic Conservation Act of 1978. NSF has published regulations under the Antarctic Conservation Act at Title 45 Part 670 of the Code of Federal Regulations. This is the required notice of permit applications received.

DATES: Interested parties are invited to submit written data, comments, or views with respect to this permit application by April 6, 2007. This application may be inspected by interested parties at the Permit Office, address below.

ADDRESSES: Comments should be addressed to Permit Office, Room 755, Office of Polar Programs, National Science Foundation, 4201 Wilson Boulevard, Arlington, Virginia 22230.

FOR FURTHER INFORMATION CONTACT: Nadene G. Kennedy at the above address or (703) 292-7405.

SUPPLEMENTARY INFORMATION: The National Science Foundation, as directed by the Antarctic Conservation Act of 1978 (Pub. L. 95-541), as amended by the Antarctic Science, Tourism and Conservation Act of 1996, has developed regulations for the establishment of a permit system for

various activities in Antarctica and designation of certain animals and certain geographic areas requiring special protection. The regulations establish such a permit system to designate Antarctic Specially Protected Areas.

The applications received are as follows:

1. *Applicant:* Permit Application No. 2007-024.

Daniel P. Costa, Department of Biology, University of California, Santa Cruz, Santa Cruz, CA 95064.

Activity for Which Permit Is Requested

Take, Import into the U.S. and Enter an Antarctic Specially Protected Area. The applicant proposes to take up to 35 Crabeater, 10 each of Leopard and Weddell seals and 5 Ross seals per year over a 3-year period. The animals will be captured, tagged, dye marked, anesthetized, blood sampled, weighed, morphometric measurements taken, muscle and/or blubber biopsy taken, whisker taken, and instrumented with SMRU CTD SRDLs and VHR's tags. Samples collected will be used to study the foraging behavior and habitat utilization of pelagic predators. Animals will be taken from the pack ice, however if this proves to be logically infeasible, then the applicant proposes to enter the Antarctic Specially Protected Areas: Dion Islands (ASPA #107); Lagotellerie Islands (ASPA #115); Avian Islands (ASPA #117) and Rothera Point (ASPA #129) to collect the required samples.

Location

Marguerite Bay, West Antarctic Peninsula, Dion Islands (ASPA #107), Lagotellerie Islands (ASPA #115), Avian Islands (ASPA #117) and Rothera Point (ASPA #129).

Dates

April 1, 2007 to August 31, 2010.

Nadene G. Kennedy,

Permit Officer, Office of Polar Programs.
