

on-site tenant interviews and file reviews could not be detected with the 500\58/50059 form data collected by the Department, which is why HUD and other agencies with means-tested programs have determined that on-site reviews and interviews are an essential complement to remote monitoring measures. The 2000 study showed that the calculation errors detectable with 50058/50059 data had further decreased, probably because this data was increasingly subject to automated computational checks.

This study will provide current information on the quality of tenant interviewing (e.g., whether they are being asked about all sources of income) and the reliability of eligibility determinations and income verification. Legislation passed in 2002 requires that the Department report on the error measurements annually. A 2003 study is being completed, and this proposed data collection approval is for the next three studies.

Members of the Affected Public: Recipients of Public Housing and Section 8 Housing Assistance subsidies.

Estimation of the Total Number of Houses Needed With Those Surveyed to Conduct the Information Collection, Including Number of Respondents, Frequency of Response, and Hours of Response: The researchers will survey approximately 550 PHA/program sponsor staff about (re)certification procedures, training, interview procedures, and problems encountered in conducting (re)certifications. Although more than one staff member may need to be contacted to obtain answers to all questions, the questionnaire will be administered once at each participating project and the interviews are expected to take less than 35 minutes. Researchers will survey approximately 3,000 program participants to obtain information on household composition, expenses, and income. The time required for these interviews will vary, but is estimated to require an average of about 50 minutes per interview.

The time estimates provided are based on the 2000 QC survey. This survey will again make use of Computer Assisted Interviewing (CAI) questionnaires and equipment, which are being used in part because they are known to reduce interview times. This software also provides for consistency checks and ensures that all needed data have been collected, thereby reducing the need for follow-up contacts.

Status of the Proposed information Collection: Pending OMB approval.

Authority: Section 3506 of the Paperwork Reduction Act of 1995, 44 U.S.C. chapter 35, as amended.

Dated: July 29, 2003.
