SUPPLEMENTARY INFORMATION:

Background

The proposed project consists of constructing a movable bridge from Carr Drive to Paradise Island across the Faciane Canal. The proposed bridge will be 135 feet long and will have a clear roadway width of 12 feet. The applicant, based upon comments from interested persons, has moved the location of the draw of the bridge to the approximate center of the channel and has increased the horizontal clearance to 30 feet between the fender system. The vertical clearance of the proposed bridge in the closed-to-navigation position is 5.7 feet above mean high water, elevation 1.3 feet above Mean Sea Level (MSL) and unlimited in the open-to-navigation position.

The proposed bridge, if approved, will be operated and lighted in accordance with the requirements of Title 33, Code of Federal Regulations, Parts 117 and 118. The bridge will be maintained in the open-to-navigation position and close for vehicular traffic by code control panels accessible only to authorized personnel.

The Coast Guard, as lead federal agency for the proposed project, has reviewed the applicant-prepared Environmental Assessment (EA). Based upon the EA, the Coast Guard has tentatively determined that the proposed action will not have a significant impact on the environment for purposes of the National Environmental Policy Act (NEPA). A Coast Guard Finding of No Significant Impact (FONSI) will be prepared as the final environmental document for the proposed project unless significant impacts are identified as a result of this public notification process to warrant the preparation of an Environmental Impact Statement (EIS).

Only two alternatives are currently being considered for this project. These alternatives are defined as the "build" and "no-build" alternatives.
