Attachment B to the Governors' Decision sets forth the price changes and related product description changes to be incorporated into the draft Mail Classification Schedule. Selected highlights of the price and classification changes follow.

Express Mail. Overall, Express Mail prices increase by approximately 5.7 percent, with average retail prices increasing by approximately 6 percent. Changes to the price structure include supplanting the current Commercial Volume Incentives category with a Commercial Plus category that provides lower prices, rather than rebates, for customers meeting specified volume levels. Customers paying through the use of qualifying metered systems will be eligible for the lower prices currently available to customers paying postage online and through authorized payment methods.

Priority Mail. Priority Mail prices increase by 3.9 percent overall, with average retail prices increasing by about 4.7 percent. Changes to the price structure include the creation of a Commercial Plus category, similar to the one for Express Mail, to provide lower prices for customers mailing specified volumes. A small flat-rate box is also added as a new Priority Mail option. Pricing incentives currently available to customers paying postage online or through authorized payment methods are extended to customers paying through the use of qualifying metered systems.

Parcel Select. Parcel Select service increases, on average, by 5.9 percent. Prices are designed to encourage dropshipping at destination delivery units (DDUs), and accordingly, increase more for destination bulk mail center (BMC) entry than for destination sectional center facility entry and DDU entry.
