SUPPLEMENTARY INFORMATION: On March 4, 2013, notice was published in the **Federal Register** (78 FR 14078) that a request for a scientific research permit to take black abalone had been submitted by the above-named individual. The requested permit has been issued under the authority of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*) and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR parts 222–226).

Permit No. 17405 authorizes scientific research activities to overcome key barriers to captive propagation of the endangered black abalone, specifically, identifying limitations to their reproduction (focusing on successful spawning, increased fertilization, increased settlement, and recruitment). No black abalone will be taken from the wild, nor will animals be returned to the wild under the permit. All animals will come from existing captive populations. The permit is valid for five years and expires on August 8, 2018.

İssuance of this permit, as required by the ESA, was based on a finding that such permit (1) was applied for in good faith, (2) will not operate to the disadvantage of such endangered or threatened species, and (3) is consistent with the purposes and policies set forth in section 2 of the ESA.

Dated: August 14, 2013.
