These regulatory requirements are distinct from the 2023 Regulation’s provisions. The revision is part of contingency planning in case the 2023 Regulation is permanently struck down. The Department of Education (“the Department”) is attaching an updated Borrower Defense Application and application for Request for Reconsideration. The forms will be available in paper and electronic forms on *studentaid.gov* and will provide borrowers with an easily accessible and clear method to provide the information necessary for the Department to review and process claim applications. Also, under the current regulations, the Department will no longer require a group application nor group reconsideration application.

l. *Description of Request:* The licensee requests a temporary variance of requirements of flow and water level to facilitate dam repair and maintenance. The licensee proposes maintenance of concrete repairs to the upstream fishway structures, replace the sluice gate due to deterioration, and perform concrete repairs to the leaking slots immediately downstream of the sluice gate. The licensee also proposes to address other maintenance needs, including

replacement of the roll gate seal to reduce leakage and repair of the fishway trap's guide support structures to ensure that the trap remains operable as a screen for keeping debris out of the fishway. Although the fishway maintenance is not a dam safety concern, the work is necessary in preparation for upcoming and required evaluations of the fishway for upstream Atlantic salmon (*Salmo salar*) passage that begin in 2026. In order to perform these repairs safely and efficiently, the licensee proposes to modify outflows and draw the impoundment down for a period of up to nine weeks, beginning on August 1, 2025, after which the water surface elevation would be raised and returned to the normal level.

In support of the proposed impoundment drawdown, and the subsequent maintenance and repair work, the licensee filed a draft Biological Assessment (BA) on January 7, 2025, which addressed the effects of the proposed action on the Gulf of Maine Distinct Population Segment (GOM DPS) of Atlantic salmon, which is federally listed as endangered under the Endangered Species Act. The draft BA also evaluated the effects of the proposed action on designated critical habitat for GOM DPS of Atlantic salmon. By letter dated March 20, 2025, Commission staff adopted the draft BA without modification as our final BA, and requested formal consultation with the National Marine Fisheries Service (NMFS). On April 21, 2025, NMFS notified the Commission that all information required to initiate formal consultation is included in the consultation request, BA, or is otherwise accessible for consideration and reference. The licensee filed supplemental information on April 28, 2025 and May 7, 2025, that discussed debris removal work that would be conducted concurrently with the proposed drawdown.
